AGENCY ISSUE NARRATIVE:

2009-2010 BUDGET YEAR NARRATIVE: IT COMPONENT? NO
 Amended 2009-10 Narrative after February 25, 2009

Issue Summary

 This issue continues transfers AT09-02/EOG #B7414 and AT09-14/EOG #B7465. In the Fiscal Year 2008-2009 Legislative Budget Request, the Department estimated the amount of budget that would be needed in each program for grant related purposes. More recent information on actual award amounts and work requirements shows a need to adjust the distribution of grant budget authority between budget entities. To align appropriations with anticipated grant expenditures, a transfer of Expenses appropriation from the Executive Direction and Support Services Budget Entity (37010100) to the Florida Geological Survey Budget Entity (37010200) is requested. (See BE 37010200, Issue Code 1600730 for offset)

AGENCY ISSUE NARRATIVE:
 2009-2010 BUDGET YEAR NARRATIVE: IT COMPONENT? NO
 Amended 2009-10 Narrative after February 25, 2009

Issue Summary

 This issue continues Budget Amendment 09-07/EOG #B0696. The Federal Grants Trust Fund (FGTF) was established in the Department effective July 1, 2008. To facilitate this change, the Department's Fiscal Year 2008-2009 Legislative Budget Request included shifts of budget authority from the Grants and Donations Trust Fund (GDTF) to the FGTF based on projections of FY2008-2009 grant awards. These fund shifts were included in the General Appropriations Act for FY2008-2009. A recent analysis of grant needs has identified that adjustments to the original fund shifts are necessary. To provide the appropriate amount of budget authority for federal and non-federal grants, a shift from the GDTF to the FGTF of \$99,000 in the Other Personal Services and Contracted Services categories is requested. (See Issue Code 1600700 for offset)

This issue is requesting to continue Budget Amendment 09-16, EOG number B0603, for the second year of the Federal Diesel Emissions Reduction Act (DERA) grant award to reduce diesel emissions in Florida. The appropriation will be used to provide \$65,000 in rebates for the purchase of Auxiliary Power Units used on large diesel trucks. This appropriation will also provide \$65,000 to install diesel emission reduction catalysts on rural school bus fleets.

Issue Summary

This issue requests \$150,000 in budget authority in the Federal Grants Trust Fund for an anticipated federal grant to the Department's Office of the Florida Geological Survey (FGS). The grant will be funded by the National Aeronautics and Space Administration. The project is part of an effort to characterize a coastal karstic watershed in North Florida for the purpose of conservation and protection through 1) development of a predictive steady state numerical model for water flow and contaminant transport and 2) assessment for potential designation as a hydrogeological observatory. The funds will be used primarily for Contracted Services with a small percentage in Expenses needed to meet FGS obligations for managing the contract and collaborating in data gathering, study planning, data analysis, and report gathering.

This issue also requests \$18,000 of Operating Capital Outlay (OCO) budget authority in the Federal Grants Trust Fund (FGTF). The FGTF was established in the Department effective July 1, 2008. To facilitate this change, the Department's

Fiscal Year 2008-2009 Legislative Budget Request included shifts of budget authority from the Grants and Donations Trust Fund to the FGTF based on projections of FY2008-2009 grant awards. These fund shifts were included in the General Appropriations Act for FY2008-2009. A recent analysis of grant needs has identified that additional budget authority is necessary. To provide the appropriate amount of federal grant authority, \$18,000 in the OCO category is requested.

AGENCY ISSUE NARRATIVE:

2009-2010 BUDGET YEAR NARRATIVE: IT COMPONENT? YES
 Issue Summary

 Senate Bill 542 amended Section 253.0325, Florida Statutes, to require the Department of Environmental Protection (DEP) to include in its modernization initiative records all lands acquired by all agencies under the Florida Preservation 2000 (P2000) Act pursuant to Section 259.101, F.S., or the Florida Forever (FF) Act pursuant to Section 259.105, F.S. This includes all land records beginning in 1990 to present, as well as any future land purchases involving P2000 and FF funding. The legislative intent of the revision to Section 253.0325, F.S. is to designate the DEP's Division of State Lands as the official land records custodians for all lands purchased with P2000 and FF funding regardless of vested title. The Division of State Lands will become the clearinghouse for the data and will maintain the sole data repository for these land records. State agencies, the legislature, and the public will be able to access these records online.

In order to meet this requirement, the DEP must accommodate the submission of land records by all recipients of P2000 and FF funds to the DEP for compilation in the Board of Trustees' Land Database System (BTLDS). Recipients of P2000 and FF funds include:

- * Department of Environmental Protection
- * Department of Agriculture and Consumer Services, Division of Forestry
- * Florida Fish and Wildlife Conservation Commission
- * Florida Department of Community Affairs, Florida Communities Trust
- * Northwest Florida Water Management District
- * Suwannee River Water Management District
- * St. Johns River Water Management District
- * South Florida Water Management District
- * Southwest Florida Water Management District

These agencies' land records systems have varying degrees of sophistication and compatibility with the DEP's current system.

In response to the legislation, the Division of State Lands' plan calls for the design and implementation of a system

ENHANCE BOARD OF TRUSTEES' LAND										
DATABASE SYSTEM (BTLDS)										53001C0

that collects the required data and incorporates it into BTLDS. The tasks identified for this plan include:

- 1) Identify land records from agencies that acquire lands using P2000 and FF funds and integrate the records into BTLDS as directed by Section 253.0325, F.S.
- 2) Enhance BTLDS to include attributes and mapping capabilities necessary for adding the additional documents to the system.
- 3) Acquire, scan, index, map, and enter data for the additional documents generated by the P2000 and FF land buying programs.
- 4) Run quality control/quality assurance processes.

A feasibility study will determine the project specifications which will allow a more precise cost summary. This study is expected to conclude by December 31, 2008. Once completed, the Division of State Lands will be able to proceed with a more accurate estimation of the funding required.

Cost Summary:

Category	Amount	Funding Source
100777	\$1 (placeholder only)	Water Management Lands Trust Fund

Amended 2009-10 Narrative after February 25, 2009

Revising request based on results of feasibility study.

Senate Bill 542 amended Section 253.0325, Florida Statutes, to require the Department of Environmental Protection (DEP) to include in its modernization initiative records all lands acquired by all agencies under the Florida Preservation 2000 (P2000) Act pursuant to Section 259.101, F.S., or the Florida Forever (FF) Act pursuant to Section 259.105, F.S. This includes all land records beginning in 1990 to present, as well as any future land purchases involving P2000 and FF funding. The legislative intent of the revision to Section 253.0325, F.S., is to designate the DEP, Division of State Lands (DSL) the official land records custodians for all lands purchased with P2000 and FF funding regardless of vested title. DSL will become the clearinghouse for the data and will maintain the sole data repository for these land records.

In order to meet this requirement, the DEP must accommodate the submission of land records by all recipients of P2000 and FF funds to the DEP for compilation in an information system. Recipients of P2000 and FF funds include:

COL A12		COL A14		COL A15		COL A16		COL A14-A12		CODES

DATABASE SYSTEM (BTLDS)										53001C0

- * Department of Environmental Protection
- * Department of Agriculture and Consumer Services, Division of Forestry
- * Florida Fish and Wildlife Conservation Commission
- * Florida Department of Community Affairs, Florida Communities Trust
- * Northwest Florida Water Management District
- * Suwannee River Water Management District
- * St. Johns River Water Management District
- * South Florida Water Management District
- * Southwest Florida Water Management District

These agencies' land records systems have varying degrees of sophistication and compatibility with the DEP's current system. Some of the data necessary to comply with Section 253.0325, F.S., already exists at DEP. Data, maps, and documents acquired by the following state-level agencies exist within the Board of Trustees Land Database System (BTLDS) to varying degrees: Department of Environmental Protection; Department of Agriculture and Consumer Services, Division of Forestry; Fish and Wildlife Conservation Commission; and Department of Community Affairs, Florida Communities Trust. The five Water Management Districts have various information systems that are used to collect data for P2000 and FF acquired lands. The lands acquired by the Water Management Districts are not included in BTLDS and must be included in the new system to meet the requirements of Section 253.0325, F.S.

In response to the legislation, DSL completed a feasibility study, which identified the following objectives.

- 1) Obtain access to data and Geographic Information System (GIS) maps
- 2) Generate maps on lands acquired using P2000 and FF funds
- 3) Report on data concerning these owned lands

The feasibility study concluded in January 2009 and determined the following funding needs by fiscal year for the Contracted Services category.

FY 2009-2010	\$ 752,005	Contracted Services, Non-recurring
FY 2010-2011	\$ 512,561	Contracted Services, Non-recurring
FY 2011-2012	\$ 39,904	Contracted Services, Non-recurring

It has been identified that four positions are needed to support the system once it is implemented. DSL will reallocate two existing positions within the Division. Therefore, the recurring costs are to fund two additional positions, including the standard expense package, beginning in FY 2011-2012. The positions will work in the GIS and Mapping Section and will provide the necessary full-time expertise in order to ensure that the GIS Base Inventory Map is kept

AGENCY ISSUE NARRATIVE:

2009-2010 BUDGET YEAR NARRATIVE:

IT COMPONENT? NO

Following the agency reorganization, which resulted in the Bureau of Laboratories becoming part of the Division of Environmental Assessment and Restoration, management determined that the water restoration support services provided by Environmental Assessment Section should be organizationally relocated from the Bureau of Laboratories to the newly created Bureau of Standards and Assessment Support. A decision was also made to rename the section as the Standards and Assessment Section (SAS). Consistent with this action is a need to shift the SAS' funding from the Environmental Laboratory Trust Fund to other appropriate funding sources. It is requested that \$736,112 of the SAS' budget be funded from the Ecosystems Management and Restoration Trust Fund, and \$467,821 from the Land Acquisition Trust Fund.

This issue is to assist small drinking water systems through the Florida Rural Water Association. The assistance will ensure that drinking water systems develop and maintain the financial and managerial expertise to provide safe drinking water. This funding will also help protect and identify potential sources of contamination that may jeopardize public water systems. It will also assist in assuring that all drinking water systems understand regulatory program rules, quality standards, treatment technologies and assist local health departments in implementing drinking water programs. This appropriation is part of the American Recovery and Reinvestment Act of 2009. It will be used to pay OPS wages.

Issue Summary

This issue will provide economic stimulus grant funding from the United States Environmental Protection Agency (EPA) as a result of the American Recovery and Reinvestment Act of 2009. The funds will be used to conduct site assessments and remediation activities to clean up petroleum contamination at orphaned sites as required by the EPA. Orphaned sites are areas classified as "shovel ready" but have no viable responsible party or land owner and areas in which cleanup activities can be started quickly.

This is funding to reduce diesel emissions by providing rebates for the installation of auxiliary power units (APUs) on diesel trucks. The funding will also be used for grants to rural school districts to reduce emissions with school bus retrofits, and for grants to reduce diesel emissions by installation of power units at truck stops. The new Truck Stop Electrification (TSE) program will reduce truck diesel emissions by allowing the truckers to turn off their engines and plug into power units. This appropriation will be used to pay OPS wages.

"Amended 2009-10 Narrative after February 25, 2009"

This issue continues funding for Cap and Trade rulemaking, which was initiated in the 2008-2009 State fiscal year with a \$250,000 appropriation. The Division of Air Resource Management will not complete the rulemaking process during FY 08-09, and therefore not fully utilize the FY 2008-09 appropriation. To complete the project, \$150,000 will be needed in FY 2009-10.

2009-2010 BUDGET YEAR NARRATIVE: DRINK WATER FAC CONSTR-SRL IT COMPONENT? NO
 Issue Summary

Requested funding continues financial assistance to local governments for the construction of drinking water systems. The Drinking Water State Revolving Fund (DWSRF) provides low interest loans to local governments and certain other utilities for construction of drinking water systems, including treatment, storage and distribution facilities. Continuing federal appropriations, which require a state matching amount (20% of the federal amount), are projected to further capitalize the revolving fund into the future.

The DWSRF is administered pursuant to the Federal Safe Drinking Water Act and Section 403.8532, Florida Statutes. Public health protection and compliance with federal and state drinking water rules are factors considered in establishing project priorities for loans. Priority rankings are based on documentation provided by project sponsors and further refined based on readiness-to-proceed, all pursuant to Department rules.

Florida's need for new or refurbished drinking water facilities, based on a federal/state needs survey, is estimated to exceed \$15 billion over the next 20 years. A subsidized revolving loan program allows local governments to maximize their resources in managing drinking water demands while recycling those funds, through repayments, for more and more projects over time. DEP's FCO budget request will continue to increase marginally over time as federal appropriations continue, more loans are made, and increasing loan repayments recycle through the program. The DWSRF is the single largest public resource available to Florida local governments to build the critical drinking water infrastructure necessary to protect public health and maintain regulatory compliance. It helps subsidize the cost of expensive infrastructure projects and promotes the development and implementation of more efficient water supplies

"Amended 2009-10 Narrative after February 25, 2009"

With the recent passage of the Federal budget, the Department was notified by the U.S. Environmental Protection Agency that the Drinking Water Revolving Fund grant would be substantially increased for the Federal Fiscal Year 2009-2010. As a result, the Department is requesting an increase to the current Fixed capital Outlay Legislative Request amount.

2009-2010 BUDGET YEAR NARRATIVE: DRINK WATER CONST-FED STM IT COMPONENT? NO
 "Amended 2009-10 Narrative after February 25, 2009"

Economic stimulus funding provided through the American Recovery and Reinvestment Act (ARRA) will supplement Florida's existing Drinking Water and Clean Water Revolving Fund grant awards. These funds will be used to provide a greater number of low interest loans to local governments and certain other utilities for construction of drinking water systems, as well as wastewater treatment and stormwater management systems. There is no match requirement for funds provided through the ARRA, and awards will be made on an expedited time frame.

AGENCY NARRATIVE:

2009-2010 BUDGET YEAR NARRATIVE: REC AND PARKS - ARRA 2009 IT COMPONENT? NO

The Office of Greenways and Trails has applied for grant funds available through the Federal Stimulus fund totaling \$3,663,134. OGT anticipates obligating all of its existing federal grant authority for FY 09-10 for grants previously applied for and needs additional grant budget authority of \$3,663,134 for the grants listed below.

Overseas Heritage Trail Lower Sugarloaf Bridge - The scope of work includes repair and safety upgrades of the bridge deck to make it suitable for use by non motorized traffic. Reconstruction activities include spall repair, milling and resurfacing of the deck, and the installation of handrails. When completed, the bridge will provide a connection for pedestrians, bicycles, and other non motorized users. Anticipated grant amount is \$843,134.

Cross Florida Greenway Crossings at CR 475/475A Road Underpasses - Installation of large culverts as trail underpasses under CR475 and CR475A for multi use trails. Connects to the I-75 Landbridge and the Florida Horsepark. Anticipated grant amount is \$2,000,000.

Additional funding for Withlacoochee Trail River Crossing at Withlacoochee River (Multi-use Trail Bridge) - Bridge and 3 miles of trail is 100% designed. Now, in permitting phase with the City of Dunnellon. Anticipated grant amount is \$320,000.

Overseas Heritage Trail Key Largo Trailhead - The facility will include public restrooms, an interpretive center with information on the Crocodile Lakes National Wildlife Refuge, the trail, and Florida's State Parks. The facility will also include a public use structure with offices to support the interpretive center. A conference room will be included to provide a meeting place for community groups and public agencies in the upper Keys. Picnic shelters, benches, water fountains, and overlooks will provide an opportunity to view the Florida's endangered crocodile. Anticipated grant amount is \$500,000.

" Amended 2009-10 narrative after February 25, 2009'

The Division of Recreation and Parks has applied for grant funds available through the American Recovery and Reinvestment Act (ARRA) totaling \$4,932,448. The Division anticipates obligating all of its existing federal grant authority for FY 09-10 for grants previously applied for, and needs additional grant budget authority of \$4,932,448 for the ARRA grants listed below.

St Andrews State Park - Four 100 ft. long, 40 ft. wide rock structures, have been engineered and will be constructed to stabilize a "critically eroded" section of St. Andrews Bay Entrance (SABE) shoreline. This section of shoreline must be stabilized to protect and prevent the breaching of the dune crest seaward of Gator Lake, a unique and environmentally sensitive fresh water coastal lake in the park. The stabilization of this section of shoreline will also slow the infilling of the federally maintained navigation channel, thereby reducing the financial and environmental impacts of dredging and sand placement along this beautiful section of inlet beach. The project was initiated by the US Army Corp of Engineers as mitigation for the erosion impacts of the SABE. The anticipated grant amount is \$2 million.

Topsail Hill State Park - Removal of two fill roads that impede the natural hydrology. Current hydrology creates a mud hole in these roads that needs to be repaired. The anticipated grant amount is \$600,000.

Key Largo Hammock State Park - Funding for the final phase of the Ocean Forest Restoration to restore the dredged entrance channel to natural elevation. The anticipated grant amount is \$1 million.

Jonathan Dickinson State Park - To identify, prioritize, organize, and provide the groundwork for implementation of scrub restoration by removal of concrete slabs, buildings, old road beds, and other leftover spoil from the Camp Murphy era (1942 to 1944) within the park. The anticipated grant amount is \$1,332,448.

Issue Summary

The Office of Coastal and Aquatic Managed Areas (CAMA) has applied for grant funds available through the American Recovery and Reinvestment Act totaling \$2,583,391. CAMA anticipates obligating all of its existing federal grant authority for FY 09-10 for grants previously applied for, and needs additional grant budget authority of \$2,583,391 for the grants awards to fund the projects below and other potential projects.

St. Joseph Bay Propeller Scar Recovery-This project will be conducted in St. Joseph Bay, Gulf County, Florida. One sixth of the Bay is covered with sea grasses, and of that nearly 5,000 acres has moderate to extremely severe scarring caused by boat propellers, which dig a channel. This project will place fabric tubes filled with sediment in these channels, which will stabilize the bottom and provide a stable substrate for sea grass to grow. Over 66,000 one meter tubes are expected to be placed in damaged areas of the Bay. The total FY 09-10 is estimated at \$1,534,844.

Restoration of molluscan shell fisheries in Habitat within Charlotte Harbor Aquatic Preserves This project will be conducted in Charlotte Harbor, Charlotte and Lee counties. Charlotte Harbor historically supported important fisheries for clams and scallops, however during the 1960s over-fishing and habitat destruction caused a dramatic decline in the fishery. This project proposes to collect brood stock from the Bay and spawn using standard aquaculture procedures. CAMA expects to produce 250 million clams and 1 million scallops to reseed depleted areas. The project will make use of substantial local volunteers to collect and distribute the shellfish, which will also accomplish an important public awareness goal. The total FY 09-10 is estimated at \$1,048,547.
