Long-Range Program Plan Approved Activity: Supply Room

PROVIDE FUNDING FOR INCREASED FUEL COST

This issue requests \$8,063 from the Highway Safety Operating Trust Fund for increased fuel costs for the Administrative Services Program. The Administrative Services program utilized delivery vehicles to transport supplies and equipment to offices located within the state. Fuel costs continue to be a major financial issue for the Department to address.

Based on the September 8, 2008, Short Term Energy Outlook projections by the Energy Information Administration (official energy statistics from the U.S. government), the cost per gallon of regular unleaded gasoline is projected at \$3.88 average pump price for 2009. The Department is projecting to spend \$12.4 million on fuel this year for all Divisions which represents nearly a 17 percent increase over the previous year. The projected expenditures are based on the same number of vehicle miles driven as the previous year.

The Department is requesting additional funding to meet current prices and to ensure that the vehicle fleet can continue to function in its mission critical capacity.

The allocation of requested funding by Division is as follows:

Florida Highway Patrol	\$1,143,987
Division of Driver Licenses	\$ 106,006
Division of Motor Vehicles	\$ 14,460
Division of Administrative Services	\$ 8,063

Total Request:	\$1,272,516

Based on the September 8, 2008, Short Term Energy Outlook projections by the Energy Information Administration (official energy statistics from the U.S. government), the cost per gallon of regular unleaded gasoline is projected at \$3.88 average pump price for 2009. The Department is projecting to spend \$12.4 million on fuel this year for all Divisions which represents nearly a 17 percent increase over the previous year. The projected expenditures are based on the same number of vehicle miles driven as the previous year.

A recurring funding increase in the amount of \$1.4 million was appropriated for the Florida Highway Patrol by the 2008 Legislature due to the extreme increases in the price of gasoline and to ensure adequate funding for critical activities. The Department is requesting additional funding to meet current prices and to ensure that the vehicle fleet can continue to function in its mission critical capacity. The Department is requesting funding to ensure the vehicle fleet can continue to function and is maintained in proper order for emergency response.

The allocation of requested funding by Division is as follows:

Florida Highway Patrol	\$1,143,987
Division of Driver Licenses	\$ 106,006
Division of Motor Vehicles	\$ 14,460
Division of Administrative Services	\$ 8,063

2009-2010 BUDGET YEAR NARRATIVE: IT COMPONENT? NO
 Long-Range Program Plan Approved Activity: Enforcement of Traffic Laws

Amended 2009-10 Narrative after February 25, 2009:

This issue requests a \$78,222 transfer from the expenses category to the deferred payment commodities contract category for payment of a consolidated financing contract for implementation of an energy performance retro-fit contract for fiscal year 2009-2010.

The proposed energy savings contract provides for the retro-fit of 59 Department owned facilities, including the Neil Kirkman building. This retro-fit plan will significantly reduce the Department's electrical consumption and fuel oil costs, thereby reducing the environmental impact of the Department's facilities. This electrical reduction in our facilities will be accomplished by installing high efficiency florescent lighting and lighting occupancy sensors, heating and air conditioning equipment replacement and the installation of an energy management system for the equipment and replacement of the current digital controls and wiring for the heating and air conditioning system in the D-wing of the Kirkman building. Fuel oil cost savings will be accomplished by replacement of the two oil fired hot-water boilers in the Kirkman building with more energy efficient natural gas boilers.

It is estimated that 1,656,267 kilowatt hours will be saved annually of which this savings funds the proposed retrofit project. It is also estimated that the project will prevent the following greenhouse gases from being released into the atmosphere: 2,651,684 lbs. of carbon dioxide, 4,024 lbs. of nitrogen oxide and 7,255 lbs. of sulfur dioxide. The recurring annual financed costs through fiscal year 2023-24 is \$156,444 with final payments occurring in year 2024-25 at a cost of \$78,222.

The request is itemized as follows:

2009-2010 BUDGET YEAR NARRATIVE: IT COMPONENT? NO
 Long Range Program Plan Approved Activity: Enforcement of Traffic Laws

Amended 2009-10 Narrative after February 25, 2009:

This issue requests \$500,000 for the continuation of the Statewide DUI Checkpoint Program that was approved in fiscal year 2008-2009.

Driving under the influence (DUI) continues to be a problem in Florida as over 22,000 DUI related crashes occur annually on Florida roadways. The Florida Highway Patrol (FHP) is committed to effectively and aggressively reducing crashes and keeping drunk drivers off the roads. This grant provides overtime funding which is used to conduct multiple DUI checkpoints each month as well as utilizing roving DUI wolfpack patrols to apprehend drunk drivers for enhancement of crash prevention and detection of impaired drivers efforts.

This grant is requested as follows:

AGENCY ISSUE NARRATIVE:

2009-2010 BUDGET YEAR NARRATIVE: IT COMPONENT? NO
 Long Range Program Plan Approved Activity: Issue Driver Licenses and Identifications Cards

Amended 2009-10 Narrative after February 25, 2009:

This issue requests \$2,806,826 to complete implementation of the 2008 Real ID Demonstration Grant Program in fiscal year 2009-10.

The Department was awarded \$3,750,926 in FY 2008-2009 in grant funding from the United States Department of Homeland Security for the 2008 Real ID Demonstration Grant Program. The grant funding is used to supplement Real ID implementation projects and to develop a national level, data exchange portal. The federally funded grant award is in addition to state funding appropriated per the 2008-2009 General Appropriations Act.

This grant provides funding to support various activities which include cleansing of legacy data of State drivers licensing records, improving document imaging and authentication of source identifying documents such as birth certificates, modifying IT networks, training and outreach for employees and drivers' license applicants, upgrading security to enhance personnel and physical security operations where driver's licensing data is held, and modifying State owned verification systems to verify personal identification information. This funding will also allow the Department to work with Indiana, Nevada and Wisconsin as a Real ID Verification Hub Pilot State. In this capacity, Florida will help to standardize drivers' license and ID card issuance as required by the REAL ID Act of 2005. Pilot State projects will help establish a centralized verification hub states share to verify source identity documents of individuals applying for a driver's license or identification card.

Budget Amendment B2009-0359(2009-09) was submitted and approved in January of 2009 in the amount of \$1,828,940 to begin implementation of the grant project in FY 2008-2009. The amendment, which was referenced in proviso language in Senate Bill 2-A, increased non-recurring appropriations, approved budget and release in the Highway Safety Operating Trust Fund, Driver Licensure budget entity (76250300), Domestic Security category (100851).

CONTINUE 2008 REAL IDENTIFICATION						
DEMONSTRATION GRANT PROGRAM						1602600

The budget amendment assumed the Department would complete \$1,828,940 of the grant project in fiscal year 2008-09 with the \$1,921,986 balance being requested in fiscal year 2009-10. However, due a delay in the project, \$884,840 of the award appropriated in fiscal year 2008-09 must be continued for fiscal year 2009-10.

The Department requests appropriation of \$2,806,826 in funding within the Driver Licensure budget entity (76250300), Domestic Security category (100851) to complete implementation efforts for the 2008 Real ID Demonstration Grant Program.

Estimated project expenditures by fiscal year are as follows:

Highway Safety Operating TF:	FY2008-09	FY2009-10	Total Award
	-----	-----	-----
2008 Real ID Grant			
Domestic Security (100851)	\$ 944,100	\$2,806,286	\$3,750,926

Summary: This is a new issue. This issue requests funding to complete the 2008 Real ID Demonstration Grant program. See the Conference Report on Senate Bill 2-A, Section 37 for proviso language and budget amendment B2009-0359 which was approved on January 27, 2009.

PRICE LEVEL INCREASES										2300000
PROVIDE ADDITIONAL FUNDING FOR OPERATION OF MOTOR VEHICLES										2300100

This issue requests \$106,006 from the Highway Safety Operating Trust Fund for increased fuel costs for the Division of Driver Licenses. Of the requested amount, \$89,039 is requested for the Driver Licensure Service and \$16,967 for the Identification and Control of Problem Drivers Service. Vehicles operated by the Divisions of Driver Licenses and Motor Vehicles were driven nearly four million miles in support of the Department's mission. Fuel costs continue to be a major financial issue for the Department to address.

Based on the September 8, 2008, Short Term Energy Outlook projections by the Energy Information Administration (official energy statistics from the U.S. government), the cost per gallon of regular unleaded gasoline is projected at \$3.88 average pump price for 2009. The Department is projecting to spend \$12.4 million on fuel this year for all Divisions which represents nearly a 17 percent increase over the previous year. The projected expenditures are based on the same number of vehicle miles driven as the previous year.

The Department is requesting additional funding to meet current prices and to ensure that the vehicle fleet can continue to function in its mission critical capacity.

The allocation of requested funding by Division is as follows:

Florida Highway Patrol	\$1,143,987
Division of Driver Licenses	\$ 106,006
Division of Motor Vehicles	\$ 14,460
Division of Administrative Services	\$ 8,063

Total Request:	\$1,272,516

AGENCY ISSUE NARRATIVE:
 2009-2010 BUDGET YEAR NARRATIVE: IT COMPONENT? NO
 Long-Program Plan Approved Activity: Consumer Safety/Protection

Amended 2009-10 Narrative after February 25, 2009:

This issue requests a \$78,222 transfer from the expenses category to the deferred payment commodities contract category for payment of a consolidated financing contract for implementation of an energy performance retro-fit contract for fiscal year 2009-2010.

The proposed energy savings contract provides for the retro-fit of 59 Department owned facilities, including the Neil Kirkman building. This retro-fit plan will significantly reduce the Department's electrical consumption and fuel oil costs, thereby reducing the environmental impact of the Department's facilities. This electrical reduction in our facilities will be accomplished by installing high efficiency florescent lighting and lighting occupancy sensors, heating and air conditioning equipment replacement and the installation of an energy management system for the equipment and replacement of the current digital controls and wiring for the heating and air conditioning system in the D-wing of the Kirkman building. Fuel oil cost savings will be accomplished by replacement of the two oil fired hot-water boilers in the Kirkman building with more energy efficient natural gas boilers.

It is estimated that 1,656,267 kilowatt hours will be saved annually of which this savings funds the proposed retrofit project. It is also estimated that the project will prevent the following greenhouse gases from being released into the atmosphere: 2,651,684 lbs. of carbon dioxide, 4,024 lbs. of nitrogen oxide and 7,255 lbs. of sulfur dioxide. The recurring annual financed costs through fiscal year 2023-24 is \$156,444 with final payments occurring in year 2024-25 at a cost of \$78,222.

This issue requests the transfer of five (5) positions and associated funding to the Florida Highway Patrol Program, Highway Safety budget entity, from the Licenses, Titles and Regulations Program, Driver Licensure budget entity to align investigations functions within the Department.

The Division of Driver Licenses currently has five (5) positions that provide confidential investigation services of cases involving possible internal fraud and employee misconduct. The investigation process involves the compilation of evidence to prove or disprove allegations of criminal misconduct.

This request transfers these positions and associated funding to this function within the Florida Highway Patrol Program for effective use of resources.

Summary: This is a new issue. This issue transfers five (5) Investigation positions to the Florida Highway Patrol Program to the Licenses, Titles and Regulations Program to align investigation functions within the Department.

AGENCY ISSUE NARRATIVE:
 2009-2010 BUDGET YEAR NARRATIVE: IT COMPONENT? NO
 Long Range Program Plan Approved Activity: Issue Driver Licenses and Identifications Cards
 Amended 2009-10 Narrative after February 25, 2009:

This issue requests \$1,150,000 in funding to implement the Improvement of Florida's Commercial Driver License Records System grant program. This project will be federally funded through the Federal Motor Carrier Safety Administration.

The objective of the Improvement of Florida's Commercial Driver License (CDL) Records System is to improve the accuracy, speed and completeness of commercial driving history over a two year period. Currently, Florida relies on a thirty year old mainframe technology and programming to process inquiries to the Commercial Driver License Information System (CDLIS) and to manage CDL data. While the Department's database meets current technology standards, the software user interfaces and data processing applications for CDL are outdated. The outdated technologies negatively affect Florida's ability to timely and accurately respond to CDLIS inquiries.

This project will move CDLIS inquiry processing off the mainframe to a new server and revise applications as necessary. This grant will also create a new user interface to allow Department employees to update records, conduct research and properly manage records in a timely and accurate manner. The grant also provides for update of applications to identify data transmission errors and to facilitate transfer of data between states. Finally, the grant will identify specific CDL records meeting criteria established by the CDLIS Modernization Working Group for clean up and modification of programming applications or manual correction of records.

The grant project is itemized as follows:

AGENCY ISSUE NARRATIVE:

2009-2010 BUDGET YEAR NARRATIVE: IT COMPONENT? NO
 Long Range Program Plan Approved Activity: Issue Driver Licenses and Identifications Cards

Amended 2009-10 Narrative after February 25, 2009:

This issue requests \$5,886,932 to implement the 2009 Real ID Compliance Grant which is currently pending award from the United States Department of Homeland Security for fiscal year 2009-10.

In January 2008, the Department of Homeland Security finalized the rules to implement the requirements of the Federal Real ID Act. This act set national standards for the issuance of driver licenses and identification cards. States were required to comply with the new standards by May 2008, unless the State filed an extension. Florida filed an extension and expects to begin issuing Real ID licenses and ID cards no later than January 2010. The 2008-2009 General Appropriations Act (GAA) provided funding for the Real ID project however the Department continues to actively pursue additional federal funding to supplement Real ID implementation projects and to ensure that the State of Florida meets mandated requirements by the target date.

The Department recently submitted a grant application to the Department of Homeland Security in the amount \$5,886,932 for 2009-10. This grant requests funding on a cost reimbursement basis to support multiple initiatives which include adding controls to the driver license application record to ensure data integrity, maintaining on-line transaction history, and identification of duplicate records and potential data errors. Funding is also provided to assist with public outreach efforts regarding changes as result of Real ID, providing law enforcement officer training, and supporting the ongoing battle against identity theft and fraud.

The requested grant funding will also aid Florida in servicing the increase in call volume experienced by the Department's Customer Service Center's appointment group. Currently, the call center and system architecture is at peak capacity. The Customer Service Center handles approximately 100,637 customer calls per month, utilizing 59 analysts on 67 available phone lines. Anticipated influxes in questions resulting from Real ID changes will result in an increase of

20 percent or 120,764 or approximately 20,000 calls per month. In order to appropriately address the increased customer call volume, enhancement and upgrade of the Department's phone and appointment systems will be necessary.

Summary: This is a new issue. The Department requests \$5,886,932 within the Driver Licensure budget entity (76250300), Highway Safety Operating Trust Fund, Domestic Security appropriation category (100851), to utilize grant funding pending award by the Department of Homeland Security for the 2009 Real ID Compliance Grant project.

2009-2010 BUDGET YEAR NARRATIVE: IT COMPONENT? NO
 Long Range Program Plan Approved Activity: Issue Driver Licenses and Identifications Cards

Amended 2009-10 Narrative after February 25, 2009:

This issue requests continuation funding of \$302,120 for FY 2009-2010 to complete implementation of the Development of Virtual Commercial Driver License Test to Evaluate Testers Grant.

The 2008-2009 General Appropriations Act (GAA) provided nonrecurring funding to implement the Development of Virtual Commercial Driver License (CDL) Test to Evaluate Testers Grant administered by the United States Department of Transportation, Federal Motor Carrier Safety Administration. The grant funds development of an evaluation process that uses computer and simulations based technology to replicate traditional methods of co-scoring live CDL skills test. The immediate benefit is a more cost-effective means of monitoring tester proficiency. The longer term goal is a higher level of monitoring that raises the quality of testing throughout Florida's CDL program, making it better able to screen out unqualified commercial vehicle drivers for the benefit of public safety.

Summary: This is a new issue. The Department requests re-appropriation of \$302,120 in funding within the Federal Grants and Donations Trust Fund, Driver Licensure budget entity (76250300) contracted services category (100777) to complete the development of the Virtual Commercial Driver License Test to Evaluate Testers grant project.

Long Range Program Plan Approved Activity: Issue Driver Licenses and Identifications Cards

FEDERAL REAL ID ACT IMPLEMENTATION

This issue requests 2nd year funding of \$4,614,687 to continue implementation of the Federal Real ID Act of 2005 and begin issuing Real ID compliant licenses and identification cards by January 2010.

In January 2008, the Department of Homeland Security finalized the rules to implement the requirements of the Federal Real ID Act. This Act set national standards for the issuance of driver licenses and identification cards. States were required to comply with the new standards by May 2008, unless the State filed an extension. Florida filed an extension and expects to begin issuing Real ID licenses and ID cards no later than January 2010.

On December 1, 2014, federal agencies will no longer accept a driver's license or identification card for official purposes from individuals born after December 1, 1964, unless the credential is REAL ID compliant. This means a person without REAL ID compliant identification will not be allowed to board commercial flights or enter certain federal facilities. On December 1, 2017, the same will apply for the remainder of the population; those born on or before December 1, 1964.

The Real ID driver license and identification standards include:

FEDERAL REAL ID ACT PLANNING						

- * Types of identification documents that may be accepted for issuance;
- * Length of time the license or identification card may be valid and the renewal periods;
- * Security requirements for the driver license facilities, systems, and employee and background checks;
- * Security features on the cards to prevent counterfeiting, fraud, and identity theft; and
- * Sharing of information between states.

The rule also requires states to improve and create new electronic verification and document imaging systems that:

- * Validate the name and date of birth assigned to each alien number (immigrants and non-immigrants);
- * Provide real-time verification of birth records
- * Provide real-time verification of all surrendered REAL ID compliant licenses and ID cards with the state of issuance;
- * Verify US Passports with the US Department of State; and
- * Electronically capture identity and proof of lawful presence documents

The implementation of the Real ID Act rules requires numerous enhancements to Florida's driver license system and new systems and infrastructure upgrades to support the electronic verification and document imaging requirements. Funding was provided in fiscal year 2008-2009 to replace the Department's aging database servers and software to handle the increased workload, increase the bandwidth of the network connection used for electronic validation, and to hire contractors to augment staff to make the first year system changes. Funding was also received for scanner upgrades, background checks, Digimarc card design and system updates, and for a public information campaign.

Additional funding for fiscal year 2009-2010 is required to support the recurring database server costs, upgrade the verification system infrastructure to a more reliable architecture, and to hire contractors to augment staff to make driver license system changes. Currently, we perform about 1.1 million electronic validation transactions per month and this number is expected to increase to 3.8 million with full Real ID implementation. The current architecture supporting electronic verification resides on the mainframe and interfaces with the field issuance system which runs on servers located in the field and connects to a centralized database via a wide area network. This system needs to be moved to a more reliable architecture based on Windows servers, similar to the electronic exchanges that are performed on the motor vehicle system. Funding is requested for \$29,230 to purchase electronic verification system servers. The work effort to implement Real ID additional driver license system requirements is estimated at over 23,000 hours. Funding for \$915,800 in the Other Personal Services category is requested for staff augmentation to hire developers for 7,878 hours at an average of \$100 an hour and one Senior Database contractor for 1,024 hours @ \$125 an hour. The total requested for contract resources is \$915,800. Funds are also requested in the amount of \$232,000 for annual recurring disk storage for additional scanned identity document portrait images and motor vehicle scanned images. The recurring cost included in the base budget for storage growth was deleted from the department's base last year because it was incorporated in the

equipment replacement for the first year.

Secretary Chertoff, of Homeland Security, announced that the average actual cost increase for issuing a REAL ID license is about \$8 per license. Because Florida has already met many of the Real ID requirements, preliminary estimates indicate that an increase of \$1.00 or less is anticipated per Florida license or ID card issued. Florida expects to begin issuing REAL ID licenses and ID cards no later than January 1, 2010 and will require an increase in funding in the Purchase of Driver Licenses category.

This issue also requests \$3,420,651 for the anticipated increase in card cost based on the projected \$1 per card increase and the January 2010 implementation date. Also included, is \$2,655 for scanner maintenance to implement the requirements of the Federal Real ID Act of 2005. The annualized amount reflects the projected annual increase.

The Real ID project started in January, 2008 and the initial software development enhancements must be completed by October 1, 2009. The Federal government needs sixty days to evaluate whether a state is compliant with Real-ID; Florida plans to start Real ID issuance on January 1, 2010. Other development activities to improve the electronic verification systems and expand the legal names fields in back-end systems have not yet been scheduled but will be initiated in software releases that will be completed in fiscal year 2009-2010.

The impact of not funding this issue is that the start of the implementation could be delayed, causing more applicants to visit an office in a shorter time period, which would adversely impact customer service. If additional disk storage is not purchased, we will not have sufficient storage to capture and retain required images. LRPP measurements of the percentage of customers who received service within specified timeframes will be adversely affected if this issue is not funded.

The issue is requested as follows:

PROVIDE FUNDING FOR INCREASED FUEL COST

This issue requests \$106,006 from the Highway Safety Operating Trust Fund for increased fuel costs for the Division of Driver Licenses. Of the requested amount, \$89,039 is requested for the Driver Licensure service and \$16,967 for the Identification and Control of Problem Drivers service. Vehicles operated by the Divisions of Driver Licenses and Motor Vehicles were driven nearly four million miles in support of the Department's mission. Fuel costs continue to be a major financial issue for the Department to address.

Based on the September 8, 2008, Short Term Energy Outlook projections by the Energy Information Administration (official energy statistics from the U.S. government), the cost per gallon of regular unleaded gasoline is projected at \$3.88 average pump price for 2009. The Department is projecting to spend \$12.4 million on fuel this year for all Divisions which represents nearly a 17 percent increase over the previous year. The projected expenditures are based on the same number of vehicle miles driven as the previous year.

The Department is requesting additional funding to meet current prices and to ensure that the vehicle fleet can continue to function in its mission critical capacity.

The allocation of requested funding by Division is as follows:

Florida Highway Patrol	\$1,143,987
Division of Driver Licenses	\$ 106,006
Division of Motor Vehicles	\$ 14,460
Division of Administrative Services	\$ 8,063

Total Request:	\$1,272,516

Amended 2009-10 Narrative after February 25, 2009:

This issue requests a transfer of \$72,180 from the Expenses category to the Contracted Services category to fund security monitoring and video surveillance contracts in driver license field issuance offices and Bureau of Administrative Reviews field offices. Monitoring and surveillance are provided through the use of over 550 security cameras and over 82 digital video recorders that record and maintain video files over extended periods of time. The files are used to assist in validating or nullifying complaints and evidence, if necessary. These systems are monitored 24 hours a day, 7 days a week by a contracted provider.

The safety system consists of various types of motion sensors, audible alarms, and silent alarms. The systems are set to sound an alarm if an office is broken into or unauthorized access of a keypad is detected. They also assist in the safety of client computers, servers, driver licenses, identification cards, and assorted items used in the production of driver licenses and identification cards. Together, the safety and security systems used by the Division of Driver Licenses provide for the protection of all assets within the realm of producing driver licenses, identification cards, employee identification cards, identification cards for other governmental agencies, and the security of all related monies, card stock and security keys.

AGENCY ISSUE NARRATIVE:

2009-2010 BUDGET YEAR NARRATIVE: IT COMPONENT? NO
 Long-Range Program Plan Approved Activity: Information Technology

Amended 2009-10 Narrative after February 25, 2009:

This issue requests a \$78,222 transfer from the expenses category to the deferred payment commodities contract category for payment of a consolidated financing contract for implementation of an energy performance retro-fit contract for fiscal year 2009-2010.

The proposed energy savings contract provides for the retro-fit of 59 Department owned facilities, including the Neil Kirkman building. This retro-fit plan will significantly reduce the Department's electrical consumption and fuel oil costs, thereby reducing the environmental impact of the Department's facilities. This electrical reduction in our facilities will be accomplished by installing high efficiency florescent lighting and lighting occupancy sensors, heating and air conditioning equipment replacement and the installation of an energy management system for the equipment and replacement of the current digital controls and wiring for the heating and air conditioning system in the D-wing of the Kirkman building. Fuel oil cost savings will be accomplished by replacement of the two oil fired hot-water boilers in the Kirkman building with more energy efficient natural gas boilers.

It is estimated that 1,656,267 kilowatt hours will be saved annually of which this savings funds the proposed retrofit project. It is also estimated that the project will prevent the following greenhouse gases from being released into the atmosphere: 2,651,684 lbs. of carbon dioxide, 4,024 lbs. of nitrogen oxide and 7,255 lbs. of sulfur dioxide. The recurring annual financed costs through fiscal year 2023-24 is \$156,444 with final payments occurring in year 2024-25 at a cost of \$78,222.

The request is itemized as follows:

AGENCY ISSUE NARRATIVE:

2009-2010 BUDGET YEAR NARRATIVE: IT COMPONENT? NO
 Long-Range Program Plan Approved Activity: Information Technology

Amended 2009-10 Narrative after February 25, 2009:

This issue reflects a \$78,222 savings from the expense category for implementation of an energy performance retro-fit contract for fiscal year 2009-2010.

The proposed energy savings contract provides for the retro-fit of 59 Department owned facilities, including the Neil Kirkman building. This retro-fit plan will significantly reduce the Department's electrical consumption and fuel oil costs, thereby reducing the environmental impact of the Department's facilities. This electrical reduction in our facilities will be accomplished by installing high efficiency florescent lighting and lighting occupancy sensors, heating and air conditioning equipment replacement and the installation of an energy management system for the equipment and replacement of the current digital controls and wiring for the heating and air conditioning system in the D-wing of the Kirkman building. Fuel oil cost savings will be accomplished by replacement of the two oil fired hot-water boilers in the Kirkman building with more energy efficient natural gas boilers.

It is estimated that 1,656,267 kilowatt hours will be saved annually of which this savings funds the proposed retrofit project. It is also estimated that the project will prevent the following greenhouse gases from being released into the atmosphere: 2,651,684 lbs. of carbon dioxide, 4,024 lbs. of nitrogen oxide and 7,255 lbs. of sulfur dioxide. The recurring annual savings costs through fiscal year 2023-24 is \$156,444 with final savings occurring in year 2024-25 of \$78,222.

The Department was appropriated \$3,383,903 in fiscal year 2008-2009 to begin implementation of the requirements of the Federal Real ID Act of 2005. Of this amount, \$508,564 was appropriated as recurring funding for fiscal year 2009-10 within the Kirkman Data Center Program, Information Technology Service, of which \$504,064 was allocated to the Deferred Commodities Contract category for financing of servers and other equipment necessary to implement the project.

In January 2009, the Department awarded the contract for acquisition of Real-ID database servers and maintenance to a private vendor. To proceed with the award, reallocation of \$152,068 in recurring funding from the Deferred Commodities Contract category to the Expenses category will be necessary to pay recurring software obligations related to the project.

The project is requested as follows:

FEDERAL REAL ID ACT IMPLEMENTATION

This issue requests 2nd year funding of \$4,614,687 to continue implementation of the Federal Real ID Act of 2005 and begin issuing Real ID compliant licenses and identification cards by January 2010.

In January 2008, the Department of Homeland Security finalized the rules to implement the requirements of the Federal Real ID Act. This Act set national standards for the issuance of driver licenses and identification cards. States were required to comply with the new standards by May 2008, unless the State filed an extension. Florida filed an extension and expects to begin issuing Real ID licenses and ID cards no later than January 2010.

On December 1, 2014, federal agencies will no longer accept a driver's license or identification card for official purposes from individuals born after December 1, 1964, unless the credential is REAL ID compliant. This means a person without REAL ID compliant identification will not be allowed to board commercial flights or enter certain federal facilities. On December 1, 2017, the same will apply for the remainder of the population; those born on or before December 1, 1964.

The Real ID driver license and identification standards that:

- * Types of identification documents that may be accepted for issuance;
- * Length of time the license or identification card may be valid and the renewal periods;
- * Security requirements for the driver license facilities, systems, and employee and background checks;
- * Security features on the cards to prevent counterfeiting, fraud, and identity theft; and
- * Sharing of information between states.

The rule also requires states to improve and create new electronic verification and document imaging systems that include:

COL A12		COL A14		COL A15		COL A16		COL A14-A12		CODES

										3610000
										36170C0

- * Validate the name and date of birth assigned to each alien number (immigrants and non-immigrants);
- * Provide real-time verification of birth records
- * Provide real-time verification of all surrendered REAL ID compliant licenses and ID cards with the state of issuance;
- * Verify US Passports with the US Department of State; and
- * Electronically capture identity and proof of lawful presence documents

The implementation of the Real ID Act rules requires numerous enhancements to Florida's driver license system and new systems and infrastructure upgrades to support the electronic verification and document imaging requirements. Funding was provided in fiscal year 2008-2009 to replace the Department's aging database servers and software to handle the increased workload, increase the bandwidth of the network connection used for electronic validation, and to hire contractors to augment staff to make the first year system changes. Funding was also received for scanner upgrades, background checks, Digimarc card design and system updates, and for a public information campaign.

Additional funding for fiscal year 2009-2010 is required to support the recurring database server costs, upgrade the verification system infrastructure to a more reliable architecture, and to hire contractors to augment staff to make driver license system changes. Currently, we perform about 1.1 million electronic validation transactions per month and this number is expected to increase to 3.8 million with full Real ID implementation. The current architecture supporting electronic verification resides on the mainframe and interfaces with the field issuance system which runs on servers located in the field and connects to a centralized database via a wide area network. This system needs to be moved to a more reliable architecture based on Windows servers, similar to the electronic exchanges that are performed on the motor vehicle system. Funding is requested for \$29,230 to purchase electronic verification system servers. The work effort to implement Real ID additional driver license system requirements is estimated at over 23,000 hours. Funding for \$915,800 in the Other Personal Services category is requested for staff augmentation to hire developers for 7,878 hours at an average of \$100 an hour and one Senior Database contractor for 1,024 hours @ \$125 an hour. The total requested for contract resources is \$915,800. Funds are also requested in the amount of \$232,000 for annual recurring disk storage for additional scanned identity document portrait images and motor vehicle scanned images. The recurring cost included in the base budget for storage growth was deleted from the department's base last year because it was incorporated in the equipment replacement for the first year.

Secretary Chertoff, of Homeland Security, announced that the average actual cost increase for issuing a REAL ID license is about \$8 per license. Because Florida has already met many of the Real ID requirements, preliminary estimates indicate that an increase of \$1.00 or less is anticipated per Florida license or ID card issued. Florida expects to begin issuing REAL ID licenses and ID cards no later than January 1, 2010 and will require an increase in funding in the Purchase of Driver Licenses category.

 GOV OPERATIONS/SUPPORT
INFORMATION TECHNOLOGY
 STATE ENTERPRISE INFORMATION
 TECHNOLOGY
 FEDERAL REAL ID ACT PLANNING

This issue also requests \$3,420,651 for the anticipated increase in card cost based on the projected \$1 per card increase and the January 2010 implementation date. Also included, is \$2,655 for scanner maintenance to implement the requirements of the Federal Real ID Act of 2005. The annualized amount reflects the projected annual increase.

The Real ID project started in January, 2008 and the initial software development enhancements must be completed by October 1, 2009. The Federal government needs sixty days to evaluate whether a state is compliant with Real-ID; Florida plans to start Real ID issuance on January 1, 2010. Other development activities to improve the electronic verification systems and expand the legal names fields in back-end systems have not yet been scheduled but will be initiated in software releases that will be completed in fiscal year 2009-2010.

The impact of not funding this issue is that the start of the implementation could be delayed, causing more applicants to visit an office in a shorter time period, which would adversely impact customer service. If additional disk storage is not purchased, we will not have sufficient storage to capture and retain required images. LRPP measurements of the percentage of customers who received service within specified timeframes will be adversely affected if this issue is not funded.

The issue is requested as follows:

FEDERAL REAL ID ACT PLANNING										

Summary: This issue requests \$4,614,687 in General Revenue funding to continue the implementation of the Federal Real ID Act.

See Issue Code 36170C0 in the Licenses, Titles and Regulations Program, Driver Licensure (76250300)
 Long Range Program Plan Approved Activity: Issue Driver Licenses and Identifications Cards

Amended 2009-10 Narrative after February 25, 2009:

This issue reduces the state funded request for implementation of the Federal Real ID Act of 2005 from \$4,614,687 to \$232,000 based on reassessment of agency needs.

The Department's fiscal year 2008-2009 legislative budget request provided for a non-recurring \$232,000 re-allocation of funds from operating capital outlay to contracted services for the Real ID project. However, the \$232,000 transfer from operating capital outlay funding, which was designated for disk storage purchases, was appropriated as a recurring reduction. Restoration of recurring disk storage funding is necessary to accommodate growth of the Department's mission critical databases (motor vehicle, driver license, driver license photo and signature image, driver license scanned image, motor vehicle scanned image, traffic crash scanned image, driver exam, web application, and warehouse/data reporting). This information supports major online transaction processing applications that provide driver license, motor vehicle and vessel titling and registration, law enforcement inquiries, as well as the bulk of the department's data exchange services. This information is used by federal and local law enforcement in all states and by other nation-wide government agencies. The Real ID program will help states improve their issuance capabilities, position states to work collectively to develop more secure systems to verify a person's identity, and reduce the issuance and use of fraudulent licenses and ID cards. Without this funding the Department would not have the storage capacity to retain the data and images required to meet the requirements of the Real ID Act and would not have the information needed to support law enforcement, motor vehicle and vessel title registration, and driver license issuance systems that generate a 1.5 billion dollar revenue source for the state.

The revised request is itemized as follows:

	FY 2009-10 Request	FY 2009-10 Non-Recurring	FY 2010-11 Annualized Cost
Driver Licensure:			
Contracted Services (100777)	\$ 0	\$ 0	\$ 0

RELOCATE MAINFRAME OPERATIONS TO SOUTHWOOD SHARED RESOURCE CENTERS - ADD

This issue requests funding in the Data Processing Services Southwood Shared Resource Center category (210021), Information Technology budget entity, to pay for mainframe services at the Southwood Shared Resource Center (SSRC). Funding is also requested in the contracted services category (100777) to relocate certain peripheral equipment associated with the mainframe environment from the Kirkman Data Center to the SSRC and funding in the expenses category (040000) for recurring data communication costs between the Kirkman Data Center and the SSRC.

This budget is needed to comply with Ch.2008-116, s.18, Laws of Fla., regarding the consolidation of mainframe resources of the Department of Highway Safety and Motor Vehicles within the SSRC. Full time equivalent positions and related budget associated with the mainframe computing requirements in the Department's Data Center were deducted from the base budget in the Kirkman Data Center Program, Information Technology service (76400100) and the Administrative Services Program, Executive Direction and Support Services (76010100). See budget entity (76400100 -deduct issue code 55C0100).

SUMMARY BUSINESS PROBLEM:

DHSMV, Department of Management Services (DMS) and Department of Transportation (DOT) maintain mainframe environments in separate locations and there is opportunity to reduce costs and improve efficiencies if these data centers are consolidated. Senate Bill 1892 was passed by the 2008 Legislature and signed by the Governor to revise Ch. 2008-116, Laws of Florida relating to the state data center system. Section 18(1) of this chapter requires that "the computing requirements currently provided by the mainframe resources of the Department of Highway Safety and Motor Vehicles and the Department of Transportation and the Southwood Shared Resource Center shall, by the first weekend after July 1, 2009, be consolidated within the Southwood Shared Resource Center". Section 18(8)(a) requires that "as part of their 2009-2010 legislative budget request, each mainframe agency shall decrease full-time equivalent positions and transfer spending authority in the existing appropriation categories to the appropriation category necessary to pay for mainframe services at the Southwood Shared Resource Center".

This issue requests funding within the Highway Safety Operating Trust Fund, Information Technology budget entity, to acquire mainframe data processing services (210021), recurring data communication lines (040000) and nonrecurring equipment relocation services (100777).

IT SERVICE AND IMPLEMENTATION APPROACH:

Consolidation is common in mainframe environments where technology to support running multiple applications and even operating systems on the same hardware has been in development since the late 1960's. The approach being taken for this effort involves establishing logical partitions (LPARs) on a large mainframe platform to isolate agency workloads while providing a single, consolidated hardware environment that shares the environmental strengths of the Southwood Shared Resource Center.

The LPAR technology was initially developed separately by Amdahl, Hitachi Data Systems and IBM for mainframe architecture ESA/390 in the mid 1980s and continued for zSeries and System z architectures. LPARs safely allow combining multiple test, development, quality assurance, and production work on the same system, offering several advantages such as lower costs, faster deployment, and more convenience. IBM mainframe LPARs are Common Criteria EAL5 certifiable, equivalent to physically separate servers with no connections, so they are appropriate for the highest security requirements, including military use. Nearly all IBM mainframes run with multiple LPARs (up to 60 in recent models), IBM System z9 and IBM System z10 support up to 60 LPARs.

The planned implementation approach is that the SSRC will acquire a new Z9-P02 Mainframe to manage their existing workload and it will be upgraded to accommodate the expansion when DHSMV and DOT applications are consolidated. SSRC will acquire a storage solution to manage current workload. Existing DOT and DHSMV storage can potentially be replicated at SSRC for testing, while leaving these production systems intact. SSRC, DOT and DHSMV will jointly identify software

products and negotiate with vendors for the best pricing and identify software mainframe personnel to move to SSRC. Comprehensive hardware and software contracts will be provided to SSRC. DHSMV will replicate and test mainframe processes within the SSRC mainframe environment and the cutover to production will occur on the weekend of July 4.

BENEFITS:

Mainframe consolidation required by Ch. 2008-116, s. 18 (a) and (b), Laws of Florida may be achieved through any combination of strategies that leverage the primary data center's economies of scale and negotiating strengths as the single provider of mainframe services to achieve savings for the state.

The Agency for Enterprise Information Technology in coordination with the SSRC shall negotiate with vendors providing mainframe hardware, operating and support software, mainframe peripherals, and related services. The benefits of this issue are anticipated to be a cost reduction due to leveraging the SSRC's economies of scale and negotiating strengths and centralization of services which will use the resources more efficiently.

ASSUMPTIONS AND CONSTRAINTS:

Project assumptions include:

- * Software pricing can be successfully negotiated with vendors to lower costs and that each agency will not be required to switch to alternative software products to consolidate by the July 2009 implementation date.
- * DHSMV's mainframe, DASD, and tape functionality can be replicated at the SSRC for comprehensive testing while allowing the existing DHSMV systems to continue production operations.

Project constraints include:

- * DHSMV's databases do not reside on its mainframe platform but the applications that run on the mainframe must have access to DHSMV's database servers; therefore high-speed high bandwidth data links connecting DHSMV to SSRC are required.
- * DHSMV's computer operation and production control staff provide support more than mainframe services; reduction reflects those that support mainframe services.

IMPLEMENTATION TIMELINE:

- * Establish service level agreement for the mainframe transition period 09/01/2008 completed
- * Identify mainframe personnel, hardware, operating and system software and peripherals to be transferred to SSRC 09/01/2008 completed.
- * Comprehensive inventory of hardware and contracts to SSRC - 10/01/2008 completed
- * Agency legislative budget request to decrease FTE and move spending authority to pay SSRC for mainframe services 10/01/2008 completed.

- * SSRC implements a cost allocation plan to establish prices 4/30/2009.
- * SSRC, DOT, and DHSMV establish service level agreements 4/30/2009.
- * SSRC, DOT, and DHSMV consolidate mainframe resources 07/04/2009.

ESTIMATED COSTS:

This issue requests funding within the Highway Safety Operating Trust Fund, Information Technology budget entity, to acquire mainframe data processing services (210021), \$1,781,310, recurring data communication lines (040000) \$37,632, and nonrecurring equipment relocation services (100777)\$30,000.

IMPACT TO OVERALL OPERATIONS:

Cost reduction impact cannot be determined until SSRC develops a cost allocation plan and software negotiations with vendors has been completed. It is not anticipated that this issue will impact business operations or customers.

ADVERSE IMPACT IF NOT APPROVED:

If this issue is not approved, the Department will not have resources in the appropriate categories to comply with the mainframe consolidation requirements required by Ch.2008-116, Laws of Florida and potential cost savings and centralization of services will not be realized.

This issue is requested as follows:

Highway Safety Operating Trust Fund:
 Kirkman Data Center Program:
 Information Technology

	FY 2009-10 Request	Recurring Amount
	-----	-----
Expenses - High-Speed High Bandwidth Data Link	\$ 37,632	\$ 37,632

Amended 2009-10 Narrative after February 25, 2009:

This issue reduces the requested funding for consolidated mainframe services from \$1,849,942 to \$958,494 for fiscal year 2009-10 per the Mainframe Consolidation Workgroup Report.

The revised issue is as follows:

Highway Safety Operating Trust Fund: Kirkman Data Center Program: Information Technology	FY 2009-10 Request	Recurring Amount
Expenses - High-Speed High Bandwidth Data Link (2)	\$ 58,016	\$ 58,016
Operating Capital Outlay:		
2 Switches (\$45,250 each)	\$ 90,500	\$ 0
2 Encryption Modules (\$22,500 each)	45,000	0
Total Operating Capital Outlay	\$ 135,500	\$ 0
Contracted Services:		
Relocate Equipment to SSRC	30,000	0
Maintenance Switches and Encryption Module	10,800	10,800
Total Contracted Services	\$ 40,800	\$ 10,800
Mainframe Data Processing Services - SSRC	\$ 724,178	\$ 715,605
Total:	\$ 958,494	\$ 784,421

Summary: This issues revises the request for consolidated mainframe service at the Southwood Shared Resource Center based on the SSRC's FY2009-2010 forecasted cost model for providing the level of mainframe services for the Department of Highway Safety and Motor Vehicles.
