AGENCY NARRATIVE:

2018-2019 BUDGET YEAR NARRATIVE: EM MGMT CRIT FAC NDS IT COMPONENT? NO

LRPP Activity:

Maintaining Capabilities of Local Emergency Management Programs

Florida Strategic Plan for Economic Development:

This issue supports the Governor's strategies to create and sustain vibrant, safe, and healthy communities that attract workers, residents, businesses and visitors. (Strategy #27)

Narrative Summary of Issue:

This issue requests non-recurring spending authority of \$1,800,000 from General Revenue, Fixed Capital Outlay Appropriation Category to provide planning and design incentive funding for up to nine (9) small population counties whose Emergency Operations Centers (EOC) do not meet at least minimum hurricane safety criteria or have insufficient emergency management workspace.

Current Situation/Unmet Need:

In Florida, county EOCs are critical to disaster response and recovery operations by providing continuity of government, direction and control of emergency operations, and communication to state and neighboring jurisdictions. To perform adequately, an EOC must be capable of surviving disaster events typical for Florida, such as a hurricane or tornado. They must also have sufficient workspace for elected officials and local leadership, response agency staff, furnishings, equipment and communications. There are nine (9) small counties across Florida with EOCs that are not recognized by the Division as meeting at least minimum hurricane safety criteria (e.g., structural vulnerabilities due to use of old building codes, lack of adequate wall reinforcement, and vulnerable to storm surge or rainfall flood hazards) or have insufficient emergency management operational workspace. The list of counties include: Bradford; Columbia; Franklin; Gadsden; Hamilton; Hardee; Suwannee; Union; and Wakulla. Small counties often struggle to finance capital projects such as planning, design and construction of an EOC. All counties on this list are small with populations of about 75,000 or less and designated as fiscally constrained.

Proposed Solution/Initiative:

The Division proposes a funding allocation be provided to each of the nine small counties to serve as an incentive to

design a new replacement or structural alteration project for an existing EOC to meet at least minimum hurricane safety and work space size criteria. The minimum structural design criteria will be the hurricane provisions of the International Code Council's storm shelter standard (ICC 500) and the minimum operational workspace will be based on guidance from the Federal Emergency Management Agency. The proposed grants will be up to \$200,000 per county for a nine county total of \$1,800,000. The grant funds will be for architectural and engineering (A/E) planning and design services only. The A/E design products will be used by local agencies to establish construction project alternatives, scopes of work and initial cost estimates, which can then be used for capital planning and preparation of grant applications. The counties will be responsible for all costs that are not eligible or exceed their funding allocation.

The EOC Phase-I design initiative will have short-term return on investment. The return on investment includes paid salaries and benefits for employed designers and consultants (e.g., architects, engineers, surveyors, project managers, estimators, drafters and administration), and a resource that can assist local leadership and planners in development of an EOC Phase-II improvement, renovation or construction strategy.

Impact of Not Funding Issue:

The impact of not funding this A/E planning and design initiative for these small counties is that they are unlikely to initiate design services for a survivable and adequately sized EOC. These issues could affect coordination activities at the local and state level in the event of a disaster.
