AGENCY ISSUE NARRATIVE:

2011-2012 BUDGET YEAR NARRATIVE: IT COMPONENT? NO

ISSUE TITLE: Medicaid Electronic Health Record Incentive Program (EHRIP)

ACTIVITY: Section 4201 of the American Recovery and Reinvestment Act (ARRA) provides funding support for certified electronic health records (EHRs) through incentive payments to eligible Medicaid providers and hospitals. Implementation of the incentive payment program will launch in FY 10/11. The program will continue to make incentive payments through 2021. A system will be developed or procured to administer the payments to providers and hospitals as well as provide outreach and technical assistance.

ISSUE SUMMARY: This issue requests authorization for continued implementation of the Medicaid Electronic Health Record Incentive Program and authority to provide incentives to the hospitals and eligible professionals as directed in 42 CFR 495.

ISSUE DETAIL: The Agency for Health Care Administration (Agency) is responsible for implementing federal incentive payments to Medicaid providers for the adoption and use of electronic health records. In 2010, the Agency applied for and was awarded \$1.7 million in planning funds to develop a state Medicaid Health Information Technology Plan that includes the steps to implement the incentive program. The Centers for Medicare and Medicaid Services (CMS) provides 90% matching funds to the Agency for planning and implementing this program. The incentives paid to providers are 100% federal funds. Providers include hospitals and eligible professionals. The final rule defines eligible professionals for the Medicaid incentive payments as non-hospital-based physicians, dentists, nurse-midwives, nurse practitioners and some physician assistants. Eligible professionals can receive up to \$63,750 over six years for adopting and meaningfully using EHR technology. In order to be eligible for incentive payments these professionals must meet certain Medicaid patient volume thresholds. Hospitals eligible for Medicaid incentive payments are acute care hospitals, critical access hospitals and children's hospitals. Acute care and critical access hospitals must have a Medicaid patient volume of at least 10% to be eligible to receive payments. Incentive payments to eligible hospitals are based on a complex formula in which a base incentive amount for all hospitals is modified by the number of Medicaid patient discharges as well as other factors.

AMERICAN RECOVERY AND REINVESTMENT ACT OF 2009							40S0000
MEDICAID ELECTRONIC HEALTH RECORD INCENTIVE PROGRAM (EHRIP)							40S0170

The Agency is developing a detailed plan for implementing the program to be completed in January 2011 for submission and approval by CMS. The Agency plans to begin registering providers into the Medicaid Electronic Health Record incentive program in April 2011, and will start making incentive payments to providers in August 2011. The Agency must have a system in place to verify eligibility and adoption of a certified EHR, correctly make the payments to providers and also exchange information with CMS to accept provider registrations into the program.

BUDGET SUMMARY: For 2011/2012, the Agency is requesting \$72,953,854 in budget authority which includes \$71,013,778 in incentives to providers, and \$1,940,076 for Contractual Services (management consulting services, marketing and outreach program for providers, technical assistance to providers, call center services and auditing services). The federal match provided for the administration of implementation activities is 90%. The incentives to providers are 100% federal match. The 10% state match will be funded out of existing operations.

AGENCY ISSUE NARRATIVE:

2011-2012 BUDGET YEAR NARRATIVE: IT COMPONENT? NO
 ISSUE TITLE: Supplemental Appropriations for Legal Representation

ISSUE SUMMARY: The General Counsel's Office handles most litigation with in-house resources (attorneys from the General Counsel's Office). On rare occasions when in-house resources may not be sufficient, the Agency for Health Care Administration ("the Agency") hires the State of Florida's Attorney General's Office ("AGO") to provide legal representation. This occurs primarily with complex class action lawsuits involving Medicaid issues brought against the Agency. In these cases, the Agency is often a co-defendant with other state agencies such as: Department of Children & Families ("DCF"); Department of Health ("DOH"); Agency for Persons with Disabilities ("APD"); and Department of Elder Affairs ("DOEA"). Experience has shown that it is cost effective for the AGO to defend the multiple agencies, with the agencies splitting the cost of representation. However, in one particular long-standing federal lawsuit, Florida Pediatric Society, et al. v. Arnold, et al. ("FPS"), United States District Court, Southern District of Florida Case No. 05-23037-CIV, the Agency is paying a 50 percent share of the fees. FPS is a class action lawsuit alleging failure of Florida state health officials to provide children in Florida who are enrolled in federally-funded medical assistance

by

with essential medical and dental services as required by Title XIX of Plaintiffs are asking the Court for injunctive relief to require the Agency to ensure payments to providers are sufficient to ensure that Medicaid eligible children have access to care and services to the same extent such care and services are available to other children in the same geographic area, and to assure such payments are consistent with quality of care. During Fiscal Year 2009-10, FPS finally went to trial. Most of the trial is expected to be completed during the current fiscal year (2010-11), but it appears probable that the trial will conclude in early Fiscal year 2011-12. Once the trial concludes, the appeal of the Court's decision in this matter will most likely also take place in Fiscal Year 2011-12. Apart from the FPS case, the Agency relies on the AGO to represent it in other litigation from time to time where the AGO has special expertise or the demands of the litigation exceed the resources of the General Counsel's Office. The demands of the FPS case demonstrate that the Agency must be prepared to pay for defense of class actions similar in scope to FPS which may be filed in the coming year. The number of federal actions challenging Agency policy in the Medicaid program has increased this year and the General Counsel's Office expects that trend to continue.

The General Counsel's budget pays for invoices from the AGO. In addition to the AGO, private outside counsel must at

times be hired. Private outside counsel costs are usually paid by the Division of Medicaid from Contracted Services.

ISSUE DETAIL: Effective legal representation is necessary to bolster the Agency's chances of winning not only the trial and appeal in FPS, but other cases that challenge Agency policy and operation of the Medicaid program. A loss could potentially cost the State of Florida anywhere from millions to billions of dollars in increased Medicaid funding. The General Counsel's Office requires additional funds to hire the AGO to finish the trial and the appeal in FPS. Because the AGO is covering the federal trial, it will provide the most effective representation for the appeal. During Fiscal Year 2009-10, the General Counsel's Office paid the AGO a total of \$487,532.78. A monthly breakdown of this total amount follows:

	FY 2009-10
July	\$ 37,242.00
August	\$ 35,981.41
September	\$ 39,515.78
October	\$ 39,847.35
November	\$ 47,515.81
December	\$ 49,380.50
January	\$ 45,111.47
February	\$ 49,410.24
March	\$ 37,106.48
April	\$ 30,007.87
May	\$ 28,708.29
June	\$ 47,705.58

The average monthly fees for representation at trial in FPS have been \$40,000. FPS is currently in trial, with an estimated 7 to 8 weeks of trial remaining. Because the Court holds trial on an intermittent basis, there is a strong possibility the trial will extend beyond June 30, 2011, with as many as four non-consecutive weeks of trial taking place in FY 2011-12. The Court's decision will likely be appealed by the non-prevailing party, with the appeal taking place in FY 2011-12.

Based on the \$40,000/month average fees, and an estimated four months time in FY 2011-12 for the trial to come to an end, the total portion of the Agency's estimated amount for representation in FPS through trial in FY 2011-12 is \$160,000 (4 months x \$40,000/month). Fees and costs to cover the appeal in FY 2011-12 are estimated at between \$72,500 and \$75,000. The trial will result in a voluminous record, estimated at this stage to exceed 60,000 pages. Approximately 700-800 hours of attorney time will be required to review this large record, write the briefs, prepare for and attend argument. Travel costs are estimated to be \$2,000. Currently, the hourly rates for the AGO are \$84.00 per hour. Five (5) percent in administrative costs will be added to the overall costs (\$84/hr x 800 hrs = \$67,200 x 5% = \$3,360 + \$67,200 = \$70,560 + \$2000 = \$72,560). Because there is a possibility the state co-defendants may be found to have no liability in the case, the Agency may have to bear this entire cost. Accordingly, the total estimated cost of FPS for FY 2011-12 is \$235,000 (\$160,000 + \$75,000).

Additionally, the General Counsel's Office is requesting funds to retain the AGO to defend the Agency in other matters that exceed the General Counsel's Office resources, including large scope class action lawsuits, which may arise in FY2011 -2012. Based on annual litigation expenses for the past year, the General Counsel's Office estimates that an additional \$500,000 will be required in order to cover any contingencies.

BUDGET SUMMARY: The additional funds the General Counsel's Office is requesting in order to continue to hire the AGO for complex lawsuits are calculated as follows:

CLASS TITLE	CC	PG	FTE	RATE	ANNUAL SALARIES	ANNUAL EXPENSES	OCO	CONTRACTED SERVICES	HR SERVICES	FY 2011-12 TOTAL

AGENCY ISSUE NARRATIVE:

2011-2012 BUDGET YEAR NARRATIVE: IT COMPONENT? NO
 ISSUE TITLE: Realign Positions and Budget between Program Components -Deduct

ISSUE SUMMARY: During FY 2009-2010, five positions were deleted in administration as an FTE reduction issue. Based on the Budget Summary, one Information Technology position was deleted. According to the GAA data, all five positions were taken from Program Component 1602000000. An adjustment to correct the Information Technology position from Program Component 16030000000 was never submitted. Specific budget authority is required to transfer this position from one program component to another.

ISSUE DETAIL: This is a technical position transfer. There is no fiscal impact.

AGENCY ISSUE NARRATIVE:

2011-2012 BUDGET YEAR NARRATIVE: IT COMPONENT? NO
 ISSUE TITLE: Convert Staff Augmented Contractor to Full Time Equivalent Positions

ISSUE SUMMARY: The Agency for Health Care Administration (AHCA), requests ten (10) Full Time Equivalent (FTE) positions at ten percent above base along with the corresponding rate and expenses in place of contracted services. The Agency currently has employees working through staff augmentation contracts. While these contracts are beneficial for short-term assignments, using these contracts for recurring programs and services is not cost-efficient. When paying for staff augmentation contracts, the Agency pays for the employees as well as a contractor fee. This issue requests ten (10) FTEs in place of the staff augmentation contracted services for an overall savings.

This Agency is requesting six (6) FTEs for the Information Technology Office for the IT Applications Development Section, three (3) FTEs for the Medicaid Contract Management Bureau, and one (1) FTE to replace a staff augmentation contractor to oversee and administer the Medicaid Encounter Data Systems (MEDS).

ISSUE DETAIL:

Information Technology:

AHCA's IT Governance Policy operation tracks an average of 12 new IT projects and 98 project enhancements annually. The

	COL A03		COL A04		COL A05		CODES

CONVERT STAFF AUGMENTED CONTRACTOR TO FULL TIME EQUIVALENT POSITIONS							3003A00

scale of these projects range from small to medium and do not pierce the \$900,000 threshold where Schedule IV-B's are required to be submitted to the Technical Review Workgroup (TRW). The Agency has been outsourcing its I.T. projects at a much greater initial and on-going cost to the state due the demands of staff augmentation contracts. Additional FTE's will also allow AHCA IT to retain the institutional knowledge needed to sustain ITs operations. The six positions would be required to possess and demonstrate proficiencies in the following areas:

- Hours of programming
- Hours of Microsoft and other software Development
- Hours providing support to current AHCA strategic systems
- Serve as IT project resources for AHCA IT initiatives
- Create and update documentation for the AHCA IT Information System Development Methodology (ISDM)

Medicaid Contract Management:

The Medicaid beneficiary caseload has increased over the four-year historical average of approximately 2.2 million to greater than 2.7 million (2005-2009), with recent estimating conference projections at 3 million by the close of the current fiscal year. This increase equates to a more than 30 percent increase over the 2005-2009 four year average. The Medicaid beneficiary caseload in fiscal year 2001-2002 was approximately 1.8 million and in that year, the staffing in the bureau was reestablished at the present levels in each of the bureau's Operations units: Systems, Provider Enrollment, Claims Resolutions/Contract Monitoring, Finance and Audit, and Recipient File Management. The bureau has since also added the Medicaid Options/Reform Choice counseling unit, with staffing levels also set at the 2001-2002 levels. Provider enrollment has also grown substantially over the past five years to a current level of more than 115,000 from approximately 85,000 in 2005, a 35 percent increase.

bÿ The work effort in the MCM bureau is directly tied to the level of ben applications to process, increased banking and financing transactions related to claims payments errors, increased claims resolutions issues to address, increased beneficiary Choice Counseling Plan/MediPass corrections such as elevated instances of "Good Cause" plan changes, increased beneficiary file maintenance corrections on the various beneficiary error/reconciliation reports, and new MMIS (system) changes to make fo bÿ Beneficiary caseload and provider enrollment will continue to increase and add to work coverage in the above areas which are already overworked.ÿÿ These and other daily, weekly, and monthly op bÿ day, and with attention to detail, and because ofÿÿ the caseload increa bÿ effectively has already suffered and will likely decline due to the overworked nature of the staff involved in this aspect of the Medicaid business operations. Continued inability to address these issues noted above, will create increased risks which could include growing delays to provider application processing timetables, inability to address banking and related financial transactions that require direct staff research and review, inability to address in a timely fashion beneficiary transactions such as "Good Cause" change requests, time delays in bureau staff review and drafting, and approval of both coding requests and testing of code promotion to modify the MMIS logic, inability to address all the line item changes regarding beneficiary enrollment error reports which can be costly in terms of overpayments made, and/ or the inability to adequately research claims payments questions and divert potential

overpayment issues from being properly addressed.

More than 20% of the current staff in all Medicaid Contract Management units work overtime most pay periods.

The System Project Analyst will be addressing the following duties and responsibilities, all of which are unique to the Medicaid Managed Care program and the related Encounter Data Collection efforts: Provide Agency technical systems expertise in the Florida Medicaid Management Information System to guide/instruct HMOs and Provider Service Networks (PSNs) through the various type claims submission processes unique to the Managed Care and Encounter Data Collection programs. Provide internal technical consultant services to Agency bureau staff that also interact with the HMOs and PSNs, both Medicaid Pilot and non-Pilot. Perform analyses to identify potential claims submission and other (primarily Plan assignment) internal Systems issues and institute changes to the MMIS to correct deficiencies, enhance the claims processing operations peculiar to the PSN managed care entities, and modify the MMIS to accommodate Plan recipient transfer emergencies and changes, routine and non-routine. Coordinate with other Agency bureau staff to devise appropriate reporting mechanisms and reports to be provided to both Agency staff and HMO/PSN providers.

Conduct system studies of the Fiscal Agent's operations to ensure the proper edits and audits are performed in order to prevent erroneous payment of PSN Direct Submitter medical claims and pricing of encounter claims. Conduct system studies of the Fiscal Agent's operations to ensure the proper tracking of PSN claims and encounter claims through the system and their identification when they are not processed within contract provisions.

One Medical Health Care Program Analyst will coordinate efforts between Medicaid Contract Management Provider Enrollment and the Bureau of Health Systems Development (HSD), and the Bureau of Managed Health Care staff, receive and process applications for managed care providers, communicate deficiencies to HSD staff and monitor for receipt of corrections, verify all managers/owners/operators are background screened per s. 409.907, F.S., direct creation of Provider Master File, Managed Care Plan File, Provider Charge File, and Submitter IDs and Passwords for IDEX and HOST websites, coordinate and process the provider data necessary to the linking of a Plan's network of treating providers to each managed care plan for the Encounter Data project. Problem solve provider file issues such as: linking of authorized submitter IDs to PSN providers, linking of Third Party Administrators (TPAs) to plans, coordinating submitter IDs to allow correct permissions for claims submission and delivery of remittance voucher (RV) information, administrative fee percentage coding, kick payment rates loading, etc.

One Medical Health Care Program Analyst will be addressing the following duties and responsibilities specific to Choice Counseling (CC) and the Enhanced Benefits (EB) program: Monitor (on-site and desk review) the performance standards (SLAs) of the CC and EB vendors for the CC and EB operations. Communicate file transfer and file content deficiencies to HSD bureau staff for participating Plans and monitor for receipt of corrections. Coordinate the CC phone and face to face activities to ensure wavier requirements for CC are being met and beneficiary needs appropriately addressed, county by county. Provide internal technical consultant services to Agency bureau staff that also interact with HMOs and PSNs.

The following performance measures are by unit staff, which ranges in size from five to nine professional staff. The new measures are based on historical averages for the measure reported and that new measure represents what we would expect

as a workload increase of at least the percent equal to the beneficiary caseload or provider enrollment increase as forecasted or already known. However, even with the FTE increase requested here, Medicaid Contract Management (MCM) staff cannot address all the current or future levels of activity (performance measures) we are experiencing or anticipate to experience. The FTE increase will certainly help to address the increased workload.

Systems Unit:

New System Architecture (requires Rules Engine and Rules Engine Changes are ongoing): Historical, 0, Increase to average of 265/year

Table Changes (in addition to CSRs): Historical, 0, Increase to average of 80/year

New Function with new FA Contract, Security HELPDDESK (previously FA managed this activity): Historical, Responsibility, Increase to need for 1/3 FTE

New CMS Requirement - Medicaid Integrated Technology Architecture (MITA); Historical, non-existent, Increase to Contracted GAP Analysis and ongoing MITA configuration to MMIS

Provider Enrollment Unit:

Coordinate provider application reviews: Historical processing, 300/week, Increase to 405

Process background screening results: Historical, 2,700, Increase to 3,645

Also, MCM now must coordinate the processing of a new "Enrollment" applications referred to as a "Registration", for HMO Plan Providers, to collect encounter claim data: Historical, 0, Increase to estimated, 5,000

Planned enrollment of new provider type (Crossover Only): Historical, 0, anticipated, 1,000+

Choice Counseling Unit:

Process "Good Cause" Plan Changes: Historical, Reform, 665/year; 3,125 Non-Reform, Increase respectively, to 850 and 4,000

Bureau of Medicaid Quality Management:

Medicaid Encounter Data System (MEDS) duties and responsibilities were assigned to the Bureau of Medicaid Quality Management three years ago with no increase in positions. The bureau had to allocate positions from other duties in order to make the Medicaid Encounter Data System (MEDS) and Reform Risk Adjustment project function. The bureau currently has only three FTEs working on MEDS/Risk Adjustment and must rely heavily on contractors. Contractors are focused on data collection and review, and running the risk adjustment model. When development of MEDS started concurrent with Medicaid Reform, it was necessary for the state to contract in order to quickly obtain the requisite skills for working with the health plans to help them prepare for encounter data submission. The state decided to require encounter data to be submitted in electronic HIPAA-compliant format and needed a contractor skilled in HIPAA coding for both medical services and pharmacy services transactions. Health plans are now submitting HIPAA-compliant encounter data to the fiscal agent and the specialized skill set is not as urgent as it has been for the past few years. However, encounter data analysis and reporting demands, in addition to Program Oversight's other critical programs (risk adjusted capitation rates for Reform counties and the federally-required Payment Error Rate Measurement), mean that the unit needs this position. Not having this position will impact the bureau's ability to generate encounter data reports and analysis or monitor contract compliance related to encounter data submissions and error remediation. There are many oversight

activities that current staff has not been able to do consistently because of all of the encounter data requests.

The Government Analyst II will be responsible to analyze encounter data submissions and ensure that health plans are providing complete and accurate encounter data. This position will be responsible for statistical analyses of data, identifying any anomalies or gaps in health plan-submitted encounter data, and developing feedback mechanisms to the health plan for reporting on and improving the data. This will also involve measuring health plan performance in various Medicaid provided services as well as geographic areas. This position will also be responsible for identifying improvements required on the state side, such as CPT or ICD-9 codes to be added to our system for capitated health plans, and communicating refinements needed in the DSS and/or FMMIS for accurate encounter data reporting.

AGENCY ISSUE NARRATIVE:

2011-2012 BUDGET YEAR NARRATIVE:

IT COMPONENT? YES

ISSUE TITLE: Primary Data Center Consolidation Relocation Cost Impact Placeholder Pursuant to s. 282.201(2)(d)1.e., F.S.

ACTIVITY: From the funds in Specific Appropriations 157, the Agency for Health Care Administration (Agency) will develop and submit a transition plan to the Executive Office of the Governor and the Chairs of the Full Appropriation Council on General Government & Health Care, and to the Senate Policy and Steering Committee on Ways and Means for the relocation and consolidation of computing services and association resources in the Ft. Knox Center to the state primary data center by June 30, 2012. The transition plan will be in accordance with the Florida Agency for Enterprise Information Technology (AEIT) requirements and will be consistent with applicable federal guidelines to identify the state's primary data center where the Agency proposes to transfer its data center service functions. All costs are recurring except those for Consulting and Certified Moving Services which will be utilized to move the Agency data center operation to the Northwood Shared Resource Center (NSRC). Forecasted costs were received by the Agency from the NSRC on September 14th, 2010.

ISSUE SUMMARY: Agency Primary Data Center Consolidation relocation cost will impact placeholder pursuant to s. 282.201(2)(d)1.e., F.S. Cost quotations were provided by the Northwood Shared Resource Center (NSRC), and the Florida Department of Management Services. Except for the certified moving and consulting services, this request represents recurring costs to the Agency.

ISSUE DETAIL: Agency Primary Data Center Consolidation relocation cost impact placeholder pursuant to s. 282.201(2)(d)1.e., F.S. Cost quotations were provided by the Northwood Shared Resource Center (NSRC) and the Florida Department of Management Services. the Agency after the Data Center Consolidation:

- Software Costs - remaining with the Agency (recurring) - \$295,053
- Facilities - Lease square footage situation will remain with the Agency after the Agency Primary Data Center is vacated (recurring) - \$78,000
- External Services - composed of Network Connectivity/Disaster Recovery - SunGard and MFN data costs (recurring) - \$620,896
- Increased Primary Data Center Network Connectivity Cost for Migration through DMS-DivTel (recurring) - \$129,629
- Consulting, Certified Moving Services (non-recurring) - \$240,000

BUDGET SUMMARY: Agency Primary Data Center Consolidation relocation cost impact placeholder of \$1,363,578, pursuant to s. 282.201(2) (d)1.e, F.S. Results from a quotation of costs provided from the Northwood Shared Resource Center (NSRC) and the Florida Department of Management Services to take over the Agency's Primary Data Center Operations.

AGENCY ISSUE NARRATIVE:

2011-2012 BUDGET YEAR NARRATIVE: IT COMPONENT? NO

ISSUE TITLE: Administrative Funding Related to the Affordable Care Act

ISSUE SUMMARY: This issue requests fourteen (14) full-time equivalent (FTE) positions and contracted services funds related to the federal Affordable Care Act that was signed into law on March 23, 2010. This funding will all be needed in FY 2011-12 in order to enact and implement certain sections of the Act.

It is important to note that the Florida Attorney General has filed a lawsuit challenging the implementation of certain aspects of the new law, including expansion of Medicaid eligibility, the requirement that each state set up an insurance exchange, and the individual mandate to purchase a qualifying health plan. The Agency for Health Care Administration is responsible for administering the Florida Medicaid program and is monitoring the progress of the federal lawsuit and the requirements of the law. Regardless, certain provisions of the Act have already gone into effect, and the impact of these provisions on Agency workload is already apparent. Policy and systems updates were required with each of these changes. Provisions effective during the 2010-2011 fiscal year include:

- (1) changes to the federal formula relating to prescription drug rebates resulting in a recalculation of dollars returned to the federal government after collection of rebates from pharmaceutical manufacturers and the integration of the new requirement that rebates be collected on prescription drugs purchased for Medicaid recipients enrolled in Medicaid managed care plans;
- (2) requirement that Medicaid programs offer tobacco cessation counseling to all pregnant women;
- (3) requirement that Medicaid programs provide all necessary services to children receiving hospice care, regardless of whether the services are palliative in nature;
- (4) changes to coverage requirements for commercial health plans, including prohibition on lifetime coverage limits and others, impacting contracting with Cover Florida plans.

In addition to these requirements, the Act contained numerous opportunities for grant or demonstration funding for states. The Agency has established 8 teams to thoroughly review and closely monitor various aspects of the Act that directly impact Florida Medicaid and the Agency. Monitoring requirements for compliance with the Acts Maintenance of Eligibility requirements is particularly important, as violation of these MOE requirements would result in the loss of all federal Medicaid funding. The Agency is taking an organized, project management approach to analyzing the various requirements and grant opportunities that are offered through the Patient Protection and Affordable Care Act. Each grant application requires agency resources and each grant awarded is accompanied by additional workload for current Agency staff. To date, Agency staff has analyzed, applied for and been awarded the following: three grants in the amount of \$4.1 million, as follows:

- (1) Agency awarded \$2.9 million for Background Screening Grant
- (2) Agency awarded \$200,000 for Money Follows the Person Planning Grant

(3) Agency awarded \$1 million for the Benefits Exchange Planning Grant

The Agency anticipates bringing these grant issues to the next available Legislative Budget Commission meeting to request authorization to proceed.

Additional staffing and resources are needed as additional provisions in the Act become effective, and for contingency planning and analysis as we move towards key implementation dates for the expansion of Medicaid eligibility for adults up to 133% of the federal poverty level. It is anticipated that this change will bring an additional 1.89 million Floridians into the Florida Medicaid program. New benefit packages and eligibility rules will likely be in place for this new group of Medicaid recipients and policies and systems must be adjusted accordingly.

Additional resources are also needed to allow for evaluation of the multiple new grant and demonstration funding opportunities outlined within the Act which will become available in the coming year. These resources will allow the Agency to take maximum advantage of funding opportunities which provide either new funding or enhanced federal matching funds so that scarce resources can be utilized as effectively as possible to serve the current and future Florida Medicaid Population.

ISSUE DETAIL: The workload for the Agency will drastically increase beginning in FY 2011-12 due to the Affordable Care Act. A variety of bureaus/units within the Agency will need additional resources to begin to enact and implement the Act. The Agency will request additional resources in the future via a Legislative Budget Request (LBR) as needed to implement the law.

Resources Requested:

Medicaid Director's Office:

Two Full-Time Equivalent (FTE) positions-Medicaid Director's Office
 These Senior Management Analyst II (PG 426) positions will work in the Director's office and one will serve as the provider recruitment and retention coordinator. The other will serve as the Affordable Care Act reporting coordinator. The Act has many new reporting requirements. This position will be responsible for monitoring those requirements and ensuring timely reporting.

Bureau of Quality Management:

Two Full-Time Equivalent (FTE) positions-Medicaid, Bureau of Quality Management
 These Government Analyst II (PG 26) positions will work in the Bureau of Quality Management. This can be tied into Section 2001 and all other sections of the Affordable Care Act. One of these positions will serve as core grant writing staff for the Agency within the Medicaid Research Contracts and Evaluations Office and to act as liaison for the Agency regarding the Affordable Care Act grant and funding opportunities, resource for grant writing and grant writing

ADMINISTRATIVE COSTS							3000130

assistance, etc. Currently, all project management staff in the bureau have been assigned to projects related to the Affordable Care Act and other Medicaid projects are going unmanaged. In addition, at the end of fiscal year 2009-10, this unit lost funding for a contract project manager, which was managing four to five projects a year.

Bureau of Medicaid Services:

One Full-Time Equivalent (FTE) position-Medicaid, Bureau of Medicaid Services
 This Senior Management Analyst II (PG 426) position will serve as Medicaid coordinator relating to Title XIX and Title XXI eligibility issues. This can be tied into Section 2001 of the Affordable Care Act. The Agency currently has one part time OPS staff dedicated to this function. With the Affordable Care Act, while eligibility for the recipient may become simplified, the Agency and the bureau will need to have an internal expert and coordinator to understand the new eligibilities and serve as liaison on eligibility issues with Title XIX and KidCare and for all Agency staff.

Bureau of Health Systems Development:

One Full-Time Equivalent (FTE) position-Medicaid, Bureau of Health Systems Development
 This Senior Management Analyst II (PG 426) position will be in the Health Systems Development Special Projects Unit and will provide support with regard to waiver extensions and/or amendments in response to maintenance of effort requirements and act as liaison for the Division of Medicaid on changes/opportunities under the Affordable Care Act which may require waiver or grant assistance. This can be tied into Section 2001 of the Affordable Care Act.

Bureau of Contract Management:

Two Full-Time Equivalent (FTE) positions-Medicaid, Bureau of Contract Management
 A Senior Management Analyst II (PG 426) position is requested in the Contract Management Enrollment Section to act as a liaison with the Department of Children and Families for system changes relating to eligibility and benefit plans and as a technical liaison with Medicaid policy bureaus. A Medical Health Care Program Analyst (PG 24) position is requested for the Choice Counseling/Medicaid Options unit to handle preparation for increased caseload and difference in benefit plans between the new and old eligibles, work to prepare Choice Counseling/Medicaid Options systems to interface with updated data based on the Affordable Care Act. This can be tied into Section 2001 of the Affordable Care Act.

Bureau of Program Integrity:

Five Full-Time Equivalent (FTE) positions-Medicaid, Bureau of Program Integrity
 These positions are requested to create a Managed Care Unit under Medicaid Program Integrity. This can be tied into Section 6402 of the Affordable Care Act regarding requiring Medicaid Integrity Program to provide the U.S. Department of Health and Human Services, Office of the Inspector General with reporting statistics. With more and more recipients enrolled in managed care as the Medicaid population grows, this unit will become more relevant. Section 6507 of the Act, with regards to the Correct Coding Initiative, will require more managed care oversight to enable auditing of encounter

data. Section 6502 of the Act demands exclusion from participation relating to certain ownership, control, and management affiliations. It will take a new unit of people in Program Integrity to keep up with the reporting documentation and requirements of the managed care organizations. The reporting requirements have already started and there is a report due to the Legislature January 1, 2011.

Currently, the Agency has approximately \$9 billion in Medicaid funds contracted to capitated managed care organizations for the period 2009-2012, or approximately \$3 billion in annual expenditures. Medicaid Program Integrity resources exclusively dedicated to the managed care fraud and abuse area are two FTEs. Implementation of this requirement would require the following additional Medicaid Program Integrity staffing resources, of which from 50% to 75% would be federally funded through Medical Care Trust Fund dollars.

- One AHCA Administrator (PG 426) position;
- Two Registered Nurse Consultants (PG 79) positions;
- One Senior Management Analyst II (PG 426) position;
- One Medical Health Care Program Analyst (PG 24) position.

As in most preventative actions, it is difficult to determine a monetary return on this investment; however, the cost of not implementing additional fraud/abuse oversight of billions in Medicaid dollars could be significant to the State.

Executive Direction Communications Office:

One Full-Time Equivalent (FTE) position-Executive Direction, Communications Office
 A Senior Management Analyst II (PG 426) position is requested in the Office of Communications which will be needed to help in carrying out the "messaging tasks" related to the Affordable Care Act. Along with this FTE, the office is requesting \$13,500 in additional travel funds for one statewide event and ten one day events that will be attended by two staff members. These staff members will need to attend/monitor meetings and conference calls in relation to the Affordable Care Act and these additional travel funds will cover that. This can be tied into Section 2001 and all other sections of the Affordable Care Act.

Contracted Services:

The Executive Direction, Communications Office is requesting additional contracted services funds in the amount of \$274,989 to contract with a Public Relations firm to help distribute clear and consistent messages due to the many more people considering Medicaid enrollment.

The Agency is also requesting additional contracted services funds in the amount of \$1,500,000. These funds to will be used to contract for an evaluation of the entire Agency's technology system to evaluate readiness and needs with regards to implementation of the Affordable Care Act. A consultant will need to be hired to come in and work in tandem with Agency staff to develop a work plan for database interconnectivity, connecting all Account Receivables systems, Medicaid claims and provider systems (FMMIS), licensing systems, Legal tracking systems, Office of Plans and Construction

information, document management systems and case tracking systems. These systems need to be connected and ready to connect to federal systems as required in the Affordable Care Act by 2014. These systems should be able to rely on each other to eliminate duplication of effort, data redundancy, and to increase data integrity. Further research is ongoing regarding the potential scope of this project and costs for projects of similar scope.

BUDGET SUMMARY: Ten percent above minimum of the base salary for all of the positions is being requested, due to the high responsibility of these positions which will allow Medicaid to recruit the caliber staff needed to efficiently develop and implement all current activities related to the Affordable Care Act. This increase will also decrease the frequency of turnover and improve the opportunity to recruit highly qualified analysts. The estimated cost to the Agency in FY 2011-2012 is calculated as follows:

ANNUAL CLASS TITLE	ANNUAL CC	HR PG	CONT FTE	FY 11-12 RATE	SALARIES	EXPENSES	OCO	SVCS	SVCS	TOTAL

AGENCY ISSUE NARRATIVE:
 2011-2012 BUDGET YEAR NARRATIVE: IT COMPONENT? NO
 ISSUE TITLE: Convert Staff Augmented Contractor to Full Time Equivalent Positions

ISSUE SUMMARY:

The Agency for Health Care Administration (AHCA), requests ten (10) Full Time Equivalent (FTE) positions at ten percent above base along with the corresponding rate and expenses in place of contracted services. The Agency currently has employees working through staff augmentation contracts. While these contracts are beneficial for short-term assignments, using these contracts for recurring programs and services is not cost-efficient. When paying for staff augmentation contracts, the Agency pays for the employees as well as a contractor fee. This issue requests ten (10) FTEs in place of the staff augmentation contracted services for an overall savings.

This Agency is requesting six (6) FTEs for the Information Technology Office for the IT Applications Development Section, three (3) FTEs for the Medicaid Contract Management Bureau, and one (1) FTE to replace a staff augmentation contractor to oversee and administer the Medicaid Encounter Data Systems (MEDS).

ISSUE DETAIL:

Information Technology:
 AHCA's IT Governance Policy operation tracks an average of 12 new IT projects and 98 project enhancements annually. The scale of these projects range from small to medium and do not pierce the \$900,000 threshold where Schedule IV-B's are required to be submitted to the Technical Review Workgroup (TRW). The Agency has been outsourcing its I.T. projects at a much greater initial and on-going cost to the state due the demands of staff augmentation contracts. Additional FTE's will also allow AHCA IT to retain the institutional knowledge needed to sustain ITs operations. The six positions would be required to possess and demonstrate proficiencies in the following areas:

- Hours of programming
- Hours of Microsoft and other software Development
- Hours providing support to current AHCA strategic systems
- Serve as IT project resources for AHCA IT initiatives
- Create and update documentation for the AHCA IT Information System Development Methodology (ISDM)

Medicaid Contract Management:

The Medicaid beneficiary caseload has increased over the four-year historical average of approximately 2.2 million to greater than 2.7 million (2005-2009), with recent estimating conference projections at 3 million by the close of the current fiscal year. This increase equates to a more than 30 percent increase over the 2005-2009 four year average. The Medicaid beneficiary caseload in fiscal year 2001-2002 was approximately 1.8 million and in that year, the staffing in the bureau was reestablished at the present levels in each of the bureau's Operations units: Systems, Provider Enrollment, Claims Resolutions/Contract Monitoring, Finance and Audit, and Recipient File Management. The bureau has since also added the Medicaid Options/Reform Choice counseling unit, with staffing levels also set at the 2001-2002 levels. Provider enrollment has also grown substantially over the past five years to a current level of more than 115,000 from approximately 85,000 in 2005, a 35 percent increase.

The work effort in the MCM bureau is directly tied to the level of beneficiaries and providers: increased provider applications to process, increased banking and financing transactions related to claims payments errors, increased claims resolutions issues to address, increased beneficiary Choice Counseling Plan/MediPass corrections such as elevated instances of "Good Cause" plan changes, increased beneficiary file maintenance corrections on the various beneficiary error/reconciliation reports, and new MMIS (system) changes to make for new program/provider type (policy) changes. Beneficiary caseload and provider enrollment will continue to increase and add to work coverage in the above areas which are already overworked. These and other daily, weekly, and monthly operations must be performed without delay, every day, and with attention to detail, and because of the caseload increases, the capacity to perform efficiently and effectively has already suffered and will likely decline due to the overworked nature of the staff involved in this aspect of the Medicaid business operations. Continued inability to address these issues noted above, will create increased risks which could include growing delays to provider application processing timetables, inability to address banking and related financial transactions that require direct staff research and review, inability to address in a timely fashion beneficiary transactions such as "Good Cause" change requests, time delays in bureau staff review and drafting, and approval of both coding requests and testing of code promotion to modify the MMIS logic, inability to address all the line item changes regarding beneficiary enrollment error reports which can be costly in terms of overpayments made, and/ or the inability to adequately research claims payments questions and divert potential overpayment issues from being properly addressed.

More than 20% of the current staff in all Medicaid Contract Management units work overtime most pay periods.

The System Project Analyst will be addressing the following duties and responsibilities, all of which are unique to the Medicaid Managed Care program and the related Encounter Data Collection efforts: Provide Agency technical systems expertise in the Florida Medicaid Management Information System to guide/instruct HMOs and Provider Service Networks (PSNs) through the various type claims submission processes unique to the Managed Care and Encounter Data Collection programs. Provide internal technical consultant services to Agency bureau staff that also interact with the HMOs and PSNs, both Medicaid Pilot and non-Pilot. Perform analyses to identify potential claims submission and other (primarily

Plan assignment) internal Systems issues and institute changes to the MMIS to correct deficiencies, enhance the claims processing operations peculiar to the PSN managed care entities, and modify the MMIS to accommodate Plan recipient transfer emergencies and changes, routine and non-routine. Coordinate with other Agency bureau staff to devise appropriate reporting mechanisms and reports to be provided to both Agency staff and HMO/PSN providers.

Conduct system studies of the Fiscal Agent's operations to ensure the proper edits and audits are performed in order to prevent erroneous payment of PSN Direct Submitter medical claims and pricing of encounter claims. Conduct system studies of the Fiscal Agent's operations to ensure the proper tracking of PSN claims and encounter claims through the system and their identification when they are not processed within contract provisions.

One Medical Health Care Program Analyst will coordinate efforts between Medicaid Contract Management Provider Enrollment and the Bureau of Health Systems Development (HSD), and the Bureau of Managed Health Care staff, receive and process applications for managed care providers, communicate deficiencies to HSD staff and monitor for receipt of corrections, verify all managers/owners/operators are background screened per s. 409.907, F.S., direct creation of Provider Master File, Managed Care Plan File, Provider Charge File, and Submitter IDs and Passwords for IDEX and HOST websites, coordinate and process the provider data necessary to the linking of a Plan's network of treating providers to each managed care plan for the Encounter Data project. Problem solve provider file issues such as: linking of authorized submitter IDs to PSN providers, linking of Third Party Administrators (TPAs) to plans, coordinating submitter IDs to allow correct permissions for claims submission and delivery of remittance voucher (RV) information, administrative fee percentage coding, kick payment rates loading, etc.

One Medical Health Care Program Analyst will be addressing the following duties and responsibilities specific to Choice Counseling (CC) and the Enhanced Benefits (EB) program: Monitor (on-site and desk review) the performance standards (SLAs) of the CC and EB vendors for the CC and EB operations. Communicate file transfer and file content deficiencies to HSD bureau staff for participating Plans and monitor for receipt of corrections. Coordinate the CC phone and face to face activities to ensure wavier requirements for CC are being met and beneficiary needs appropriately addressed, county by county. Provide internal technical consultant services to Agency bureau staff that also interact with HMOs and PSNs.

The following performance measures are by unit staff, which ranges in size from five to nine professional staff. The new measures are based on historical averages for the measure reported and that new measure represents what we would expect as a workload increase of at least the percent equal to the beneficiary caseload or provider enrollment increase as forecasted or already known. However, even with the FTE increase requested here, Medicaid Contract Management (MCM) staff cannot address all the current or future levels of activity (performance measures) we are experiencing or anticipate to experience. The FTE increase will certainly help to address the increased workload.

Systems Unit:

New System Architecture (requires Rules Engine and Rules Engine Changes are ongoing): Historical, 0, Increase to average of 265/year

Table Changes (in addition to CSRs): Historical, 0, Increase to average of 80/year

 Also, MCM now must coordinate the processing of a new "Enrollment" applications referred to as a "Registration", for HMO Plan Providers, to collect encounter claim data: Historical, 0, Increase to estimated, 5,000
 Planned enrollment of new provider type (Crossover Only): Historical, 0, anticipated, 1,000+

Choice Counseling Unit:

Process "Good Cause" Plan Changes: Historical, Reform, 665/year; 3,125 Non-Reform, Increase respectively, to 850 and 4,000

Bureau of Medicaid Quality Management:

Medicaid Encounter Data System (MEDS) duties and responsibilities were assigned to the Bureau of Medicaid Quality Management three years ago with no increase in positions. The bureau had to allocate positions from other duties in order to make the Medicaid Encounter Data System (MEDS) and Reform Risk Adjustment project function. The bureau currently has only three FTEs working on MEDS/Risk Adjustment and must rely heavily on contractors. Contractors are focused on data collection and review, and running the risk adjustment model. When development of MEDS started concurrent with Medicaid Reform, it was necessary for the state to contract in order to quickly obtain the requisite skills for working with the health plans to help them prepare for encounter data submission. The state decided to require encounter data to be submitted in electronic HIPAA-compliant format and needed a contractor skilled in HIPAA coding for both medical services and pharmacy services transactions. Health plans are now submitting HIPAA-compliant encounter data to the fiscal agent and the specialized skill set is not as urgent as it has been for the past few years. However, encounter data analysis and reporting demands, in addition to Program Oversight's other critical programs (risk adjusted capitation rates for Reform counties and the federally-required Payment Error Rate Measurement), mean that the unit needs this position. Not having this position will impact the bureau's ability to generate encounter data reports and analysis or monitor contract compliance related to encounter data submissions and error remediation. There are many oversight activities that current staff has not been able to do consistently because of all of the encounter data requests.

The Government Analyst II will be responsible to analyze encounter data submissions and ensure that health plans are providing complete and accurate encounter data. This position will be responsible for statistical analyses of data, identifying any anomalies or gaps in health plan-submitted encounter data, and developing feedback mechanisms to the health plan for reporting on and improving the data. This will also involve measuring health plan performance in various Medicaid provided services as well as geographic areas. This position will also be responsible for identifying improvements required on the state side, such as CPT or ICD-9 codes to be added to our system for capitated health plans,

AGENCY ISSUE NARRATIVE:

2011-2012 BUDGET YEAR NARRATIVE:

IT COMPONENT? YES

ISSUE TITLE: Enhanced Detection Technology

This issue requests \$40,000 in recurring and \$760,000 in non-recurring budget authority in the Contracted Services Category (100777) totaling \$800,000 in the Medical Care Trust Fund to replace the current case tracking system with an improved case management system that incorporates advanced detection tools. The improved case tracking system will incorporate improved trending capabilities for complaint intake, Explanation of Medicaid Benefits (EOMB) analysis, and audit resolutions. Detection tools such as predictive analytics and neural networking will further enhance MPI's ability to target investigations and audits to ensure the most return on our resource investment. An improved case management system that incorporates advanced detection tools will greatly assist the Agency in identifying high risk areas. The detection and trending tools will alert the Agency to procedure codes and providers that are exhibiting higher than normal fraud indicators. This will allow the Agency to assign resources to high-risk areas. The current tracking system, Fraud and Abuse Case Tracking System (FACTS) was written with software (Classic ASP) that is not fully supported by the agency. The agency must maintain separate application and database servers for the development and production processes. This system is approaching 10 years of age and is both expensive and difficult to update for enhancements due to outdated technology. This system is a "stand-alone" system and does not benefit from enhancements used by software that is more widely used and accepted in industry today. There is no automated detection module in FACTS. Any detection identified from FACTS is manually done by ad hoc reports created within the system. Should the Agency not get funding for the request, the Agency will continue limiting itself to 10-year-old technology that does not take advantage of new advancements in technology could miss opportunities to detect fraud and abuse. Specifically, the agency would not benefit from the highly publicized and accepted benefits of neural networking and the detection capabilities.

The improved case tracking system will have to incorporate data from the current system. Procedures to do so must be developed, tested and implemented prior to the new system being put into production. There are several internal operating procedures that must be updated during the migration from one system to the next. Connections with the Medicaid Accounts Receivable (MAR) system will be crucial in order to maintain history of payments by providers who owe the state money.

Medicaid fraud and abuse is a national concern. The 2009 Legislative Session with Senate Bill 1986 designated Miami-Dade as a health crisis area. The entire bill stresses the urgency the Legislature places on the need for additional efforts to prevent, reduce and mitigate health care fraud, waste and abuse as we strive to maintain the integrity of the Medicaid Program, oversee the financial responsibility associated with administration of the program and provide "BETTER HEALTH CARE FOR ALL FLORIDIANS." The Legislature and OPPAGA continue to recommend expansion of our use of advanced detection methodologies to strengthen our safeguarding of Medicaid funds

Florida's Medicaid Program expenditures have grown from \$6 billion to more than \$20 billion in the last ten years. Florida's program is the fourth largest nationwide. The Bureau of Medicaid Program Integrity is charged with minimizing fraudulent and abusive behavior, identifying and recovering overpayments, and imposing sanctions as appropriate. The bureau must perform investigations and audits efficiently, effectively and of such quality that they will withstand litigation challenges. The Office of Program Policy Analysis and Government Accountability (OPPAGA) continues to recommend expansion of our use of advanced detection methodologies (Report no. 10-32 March 2010): "While AHCA has strengthened its ability to safeguard Medicaid funds, it has not taken several recommended steps. AHCA has not expanded its use of advanced technologies to detect funds lost to error, abuse, and fraud. As Medicaid billing is highly complex and services are delivered by a wide range of providers, it is important for AHCA to use an array of detection methods to identify billing errors, abuse, and potential fraud. AHCA uses several techniques, which include routine and ad hoc statistical analyses, to identify providers that have violated Medicaid payment policies while others try to identify providers with aberrant billing patterns when compared to peers." OPPAGA recommended that the Agency expand its detection tools to include neural networking or other advanced techniques capable of identifying emerging patterns of abuse and fraud.

By targeting the high-risk areas identified via the new technology, MPI's Return on Investment (ROI) should increase dramatically. The new system will save time for data analysts, nurses, pharmacists, as well as investigators. Improper costs to the Medicaid program will, at times, be avoided altogether and regularly returned to the state as they are identified and recovered. It is expected that, with the implementation of the new software, recoveries will clearly be measured through the agency's dashboard reports and legislatively-mandated annual reports. The new system will be able to generate letters from the system. This will save time and reduce errors from our current procedure. Manual investigations not only suffer from high costs, longer timelines and poor collaboration they are less effective leading to lower prevention and recovery rates.

The Systems Development Life Cycle (SDLC) approach will be used to develop the new case tracking system. The SDLC includes the following phases: Systems Analysis, Systems Design, Implementation, Testing, Operations and Maintenance.

- Systems analysis: Refines project goals into defined functions and operation of the intended application. Analyzes end-user information needs and collects requirements.
- Systems design: Describes desired features and operations in detail, including screen layouts, business rules process diagrams, pseudo code and other documentation.

	COL A03		COL A04		COL A05		CODES

- Implementation: The programming language code is developed and installed on application server(s).
- Testing: Brings all the pieces together into a special testing environment, then checks for errors, bugs and interoperability.
- Operations: The final stage of initial development, where the software is put into production and runs actual business.
- Maintenance: The continuing stage of implementing changes, correction, additions, and moves to a different computing platform.

The implementation schedule will vary depending on several factors of the new system. If the system is a commercial off the shelf (COTS) system, there will be less customization capabilities, but a quicker implementation schedule (probably 6-9 months). If the system is a custom-designed system, a development schedule expectation would be from 9-15 months. The tracking system is a key feature of MPI. Many of the bureau's operations depend on FACTS. We will have to carefully ensure that current operations can continue (or be enhanced) by the new case tracking system. Many procedures will need to be rewritten to take advantage of the expanded functionality of the new system.

AGENCY ISSUE NARRATIVE:

2011-2012 BUDGET YEAR NARRATIVE: IT COMPONENT? NO
 ISSUE TITLE: Children's Health Insurance Program Reauthorization Act Grant (CHIPRA)

ISSUE SUMMARY: This issue requests (1) OPS position within the Agency for Health Care Administration (Agency), and contracted services funds totaling \$1,199,252 in budget authority to administer and implement a federal grant funded by the Centers for Medicare and Medicaid Services (CMS) under the Children's Health Insurance Program Reauthorization Act (CHIPRA). The total grant award is \$11,277,361 over five years. Grant year 1 funds were authorized by CMS and the funds for grant years 2 through 5 will be negotiated with CMS. The Agency will request future budget authority via a Legislative Budget Request (LBR) and this request is for year 2. The grant year started in February 2010 and will end February 2015. The grant includes several categories of activities aimed to improve health outcomes for children by greatly enhancing access to information for use by providers, consumers, and state agencies and undertaking new quality improvement activities in Medicaid and Children's Health Insurance Programs.

ISSUE DETAIL: The grant awards the Agency for Health Care Administration \$11,277,361 over five years. These funds will be used by the State of Illinois, the Department of Health (DOH), and contractors. The grant requires a full-time Project Director. The grant one full-time OPS position (at \$25/hour) starting July 1, 2011.

BUDGET SUMMARY: Grant year 2 funds are \$3,353,215. The total cost for the OPS position beginning July 1, 2011 will be \$29,978 including FICA. Also included in the year two amounts is \$100,000 in authority to draw down federal match for activities related to federal grant projects. The Department of Health will also transfer \$100,000 for the state match required to draw down these federal funds at the Medicaid Administrative match rate. The Agency and DOH will execute an interagency agreement for the transfer of grant funds. The total grant funds include the OPS position. The estimated cost to the Division of Medicaid in FY 2011-2012 is calculated as follows:

AGENCY ISSUE NARRATIVE:

2011-2012 BUDGET YEAR NARRATIVE:

IT COMPONENT? NO

ISSUE TITLE: Administrative Funds for the Development and Implementation of a Medical Home Program

ISSUE SUMMARY: This issue requests \$484,677 in recurring and \$7,796 in Non-Recurring budget in the Medical Care Trust Fund to develop and implement a newly created Medical Home program which will allow for a patient centered approach to providing continuous and comprehensive care in a physician directed medical practice. The Agency for Health Care Administration is legislatively allowed to develop and implement a Medical Home program as a new model of service delivery for enrolled Medicaid recipients.

ISSUE DETAIL: The Medical Home approach incorporates quality, evidence based medicine and a 'whole person' orientation that includes patient involvement in decision making and care plan development. This coordinated system of care improves health status, provides improved quality of care outcomes, directs the appropriate level of utilization of services, and provides an education component for disease self management for complex and chronic care recipients.

The Medical Home program initially will be implemented in particular geographic areas of the state as a pilot program. Implementation of the newly created Medical Home program will require procurement development, review of bids, and subsequent awarding of contracts. Once executed, the new contracts will require contract management, monitoring and program evaluation. Additional resources are needed to implement and manage the Medical Home program. We anticipate that we will be able to bring up the pilot within current agency, without additional general revenue costs for services and payments to providers. We are currently exploring the option, made available through the Affordable Care Act, for a state plan amendment to implement a "health home" which will provide the states with 90/10 federal match.

It has been determined that two Medical Health Care Program Analysts (pay grade 24) positions at 10 percent over the minimum of this position are needed to effectively develop, implement and effectively manage a Medical Home program. These positions need to be funded 10 percent over minimum in order to attract highly qualified applicants.

Evaluation is a critical element of the program. The Agency will continually assess the program and make real time adjustments to improve operations. In addition, measuring program performance is vital to confirm validity of the service delivery model and track the success of the program prior to the pilot expanding to additional geographic areas. Contracted services funds are being requested in the amount of \$300,000 for the purpose of an independent program evaluation. This amount is in line with what the Agency currently pays a contractor for the Medicaid Reform evaluation. In addition, a part-time OPS position at the rate of \$40.00 per hour for 1,040 hours annually is being requested to serve as contract manager of the Medical Home program evaluation contract.

The Medical Health Care Program Analysts will be dedicated to contract management, operations and policy development for the new delivery system. The analyst responsibilities include the following:

- Procurement development and processing;
- Contract development, routing and execution;
- Coordinate internally with the Agency wavier liaison and correspond with the Centers for Medicaid and Medicare (CMS) for contract approval and operational updates;
- Identifying edits necessary to the fiscal agent system and submitting necessary CSRs to implement the program;
- Program oversight and monitoring;
- Program performance;
- Complaint reporting and resolution;
- Communication with providers, stakeholders and recipients;
- Technical assistance; and
- Coordination with multiple bureaus within the Agency.

Contracted Services for the independent evaluation of the new Medical Home program and the OPS analyst responsibilities include:

- Contract management of the independent Medical Home program evaluation contract;
- Components of the independent evaluation include:
 - Provider Satisfaction Survey
 - Beneficiary Satisfaction Survey
 - Performance Measures
 - Cost and Utilization Analysis
 - Program Effectiveness / Incentives available
 - Recommendations for improvement.

The benefit to the state is that the Medical Home concept offers an alternative model of managed care that is based on a physician directed, whole person orientation integrated approach to managing the health care needs of each individual.

Health care is coordinated across all elements of the health care system which produces increases in quality of care, improved health outcomes and cost containment as level of service provision is appropriately directed to health care need.

BUDGET SUMMARY: Ten percent above minimum of the base salary for a pay grade 24 (\$41,106) is being requested due to the high responsibility of these positions which will allow Medicaid to efficiently develop and implement a Medical Home Program. This increase will also decrease the frequency of turnover and improve the opportunity to recruit highly qualified analysts.

AGENCY ISSUE NARRATIVE:

2011-2012 BUDGET YEAR NARRATIVE:

IT COMPONENT? NO

ISSUE TITLE: Child Health Care Check-up Provider (CHCUP) Reimbursement for Collection and Handling of Blood Specimens

ISSUE SUMMARY: The Child Health Check-Up (CHCUP) is a comprehensive medical screening service available to all children enrolled in Medicaid. This issue proposes increasing the CHCUP reimbursement rate to the same as the most comprehensive office visit code. This issue also proposes paying CHCUP providers for collection and handling of lab specimens during a CHCUP visit to help increase the number of children receiving blood lead testing.

ISSUE DETAIL: The Centers for Medicare and Medicaid Services requires blood lead testing of Medicaid eligible children at 12 months and 24 months and between 36 and 72 months of age for children who have not been previously screened for lead poisoning. Section 381.985(2)(a), F.S., of the Lead Poisoning Prevention Screening and Education Act, requires blood lead testing be available for Medicaid eligible children. Currently Medicaid providers are not reimbursed for the collection and handling of lab specimens during a Child Health Check-up (CHCUP) visit. In many cases, Medicaid eligible children are being referred to a Medicaid-enrolled laboratory for the blood lead test. Some families do not follow through with the visit to a lab, and in those circumstances the child likely does not receive blood lead testing.

The CHCUP service increases the early identification of medical conditions before they become serious and disabling; thereby potentially decreasing future treatment costs. CHCUP is currently paid at the rate of \$71.58, which is for Procedure Code 99204 (a comprehensive office visit). This request proposes increasing the CHCUP reimbursement rate to \$90.98, which is the most comprehensive office visit, Procedure Code 99205. This level of visit more accurately reflects the many elements of the CHCUP that a provider must perform. In addition, the 2008 guidelines from Bright Futures/American Academy of Pediatrics recommends that providers use a standardized developmental screening tool for children who may be at risk and periodically (at specific ages) for all children to ensure the early identification of developmental delay. Autism screening is now also recommended at 18 and 24 months of age. Increasing the reimbursement for CHCUP services to the same as the most comprehensive office visit code would more accurately reflect the level of work involved in the CHCUP and may provide an incentive for providers to use the recommended standardized developmental screening tool.

BUDGET SUMMARY: This issue proposes a \$2 fee for the collection and handling of lab specimens for an estimated 145,846 federal and state required blood lead tests during a CHCUP visit or other related office visit for FY 11-12. Screening for blood lead can lead to effective early interventions, decreasing overall treatment costs later.

Estimated Number for FY 11-12	145,846
Cost per Blood Sample	\$2.00
Total Cost	\$291,692

This issue also proposes to increase the reimbursement of CHCUP services by \$19.40, which is paying for these CHCUP services at the rate of the most comprehensive office visit. It is assumed that with this fee increase the screenings per month would increase by an estimated five percent.

AGENCY ISSUE NARRATIVE:

2011-2012 BUDGET YEAR NARRATIVE: IT COMPONENT? NO
 ISSUE TITLE: Children Receiving Hospice Care

ISSUE SUMMARY: Section 2302 of the Affordable Care Act requires states to provide all medically necessary services to children receiving hospice care. Currently, Florida Medicaid only provides palliative care for the child's terminal diagnosis and related conditions which means that Florida provides a medical specialty that helps these children and their families live as fully as possible when faced with life-threatening problems.

ISSUE DETAIL: Children on hospice are currently able to receive Medicaid fee-for-service services for conditions not related to their terminal diagnosis. The Affordable Care Act is requiring states to provide all medically necessary services to children receiving hospice care. It is anticipated that more individuals will elect hospice care if they are advised that they could elect hospice and still continue curative treatment for their terminal diagnosis. It is reasonable to assume that the number of children in hospice would essentially double.

BUDGET SUMMARY: This issue requests reimbursement to cover medically necessary services to children receiving hospice care. Using FY 2009-10 data it is estimated that 136 children are currently receiving hospice care for a total of 76,808 units used and for a total cost of \$3,600,611. Since it is anticipated that these numbers would double due to the requirements contained in the Affordable Care Act specific to the provision of curative treatment, the Agency requests an additional \$3,600,611 in funding to cover the costs for the additional children who would elect hospice care.

AGENCY ISSUE NARRATIVE:

2011-2012 BUDGET YEAR NARRATIVE:

IT COMPONENT? NO

ISSUE TITLE: Realignment of Program of All-Inclusive Care for the Elderly (PACE) Expansion Budget to the Correct Appropriation Category (Deduct)

ISSUE SUMMARY: Currently, funding for the Program of All-inclusive Care for the Elderly (PACE) is included in the Capitated Nursing Home Diversion waiver (NHD) appropriation. Although both programs were designed to offer frail elders and disabled adults with program alternatives to nursing home placement, the programs' growth has created a need for separate appropriations. This issue proposes removing the PACE budget from the Nursing Home Diversion appropriation line item and creating a separate appropriation line item for PACE.

ISSUE DETAIL: There are currently three PACE providers that have been approved to operate a total of six sites. The Florida PACE Center in Miami operates two sites and has an appropriation for 350 participants. Hope Select Care PACE Program is located in Ft. Myers and has expanded to two additional sites in Port Charlotte and Lehigh Acres. Hope Select Care has an appropriation for 250 participants. Neighborly PACE Center is located in St. Petersburg and has an appropriation for 150 participants. The 2010 legislature has appropriated 200 slots to LifePath PACE in Hillsborough County. The provider has recently submitted its PACE application which is currently under review by the state.

At the present time, the Nursing Home Diversion program has 17 providers offering services in 37 counties with 22,000 plan members. Since most of the current appropriation is allocated for the Nursing Home Diversion program due to its larger enrollment, PACE providers have difficulty understanding why sufficient funding is not available for their site expansions. This issue proposes a separate appropriation for the PACE program to eliminate confusion about available funding for program expansions.

BUDGET SUMMARY: The FY 2010-11 Capitated Nursing Home Diversion appropriation total is \$347,885,072. From this appropriation, AHCA and DOEA have allocated \$337,924,993 to the Nursing Home Diversion program and \$9,960,079 to the PACE program. The allocation is based upon program enrollment and projected plan member capitation costs.

and disabled adults with program alternatives to nursing home placement, the programs' growth has created a need for separate appropriations. This issue proposes removing the PACE budget from the Nursing Home Diversion appropriation line item and creating a separate appropriation line item for PACE.

ISSUE DETAIL: There are currently three PACE providers that have been approved to operate a total of six sites. The Florida PACE Center in Miami operates two sites and has an appropriation for 350 participants. Hope Select Care PACE Program is located in Ft. Myers and has expanded to two additional sites in Port Charlotte and Lehigh Acres. Hope Select Care has an appropriation for 250 participants. Neighborly PACE Center is located in St. Petersburg and has an appropriation for 150 participants. The 2010 legislature has appropriated 200 slots to LifePath PACE in Hillsborough County. The provider has recently submitted its PACE application which is currently under review by the state.

At the present time, the Nursing Home Diversion program has 17 providers offering services in 37 counties with 22,000 plan members. Since most of the current appropriation is allocated for the Nursing Home Diversion program due to its larger enrollment, PACE providers have difficulty understanding why sufficient funding is not available for their site expansions. This issue proposes a separate appropriation for the PACE program to eliminate confusion about available funding for program expansions.

BUDGET SUMMARY: The FY 2010-11 Capitated Nursing Home Diversion appropriation total is \$347,885,072. From this appropriation, AHCA and DOEA have allocated \$337,924,993 to the Nursing Home Diversion program and \$9,960,079 to the PACE program, Special Category (109971). The allocation is based upon program enrollment and projected plan member capitation costs.

AGENCY ISSUE NARRATIVE:

2011-2012 BUDGET YEAR NARRATIVE:

IT COMPONENT? YES

ISSUE TITLE: Online Licensing and Reconciliation System

ACTIVITY: ACT7020, Automating Licensure Applications, Measure number 36 - 51

BUDGET ISSUE SUMMARY: This issue requests funding for full implementation of online licensing for 29 provider types in the Division of Health Quality Assurance, including online payment, integration with document management, web portal for providers to submit applications, check status, and update licensure information between license renewals. The project will provide single sign-on capability to providers to have one user account for multiple online systems, email notifications for reminders and deadlines, requests for additional information (omissions) and will integrate with all Agency fees, assessments, overpayments, and fines to facilitate full collection before licenses are issued. Three year project: Total \$5,161,600 = 1,751,600 FY 11/12 + 2,322,800 FY 12/13 + 1,087,200 FY 13/14.

BUSINESS PROBLEM: The total number of providers under the jurisdiction and authority of the Division of Health Quality Assurance and the total number of applications processed for these providers continues to increase. Agency staff process initial and renewal applications for licensure and/or certification and required inspections for these providers. To date, the Agency has been able to meet the needs of this caseload growth without requiring additional resources; however, the ability to continue to stretch existing resources to meet growing needs can only be accomplished through the development of efficiencies such as electronic automation of paper-and-labor-intensive processes.

During FY 09/10 AHCA wrote off \$4,246,215 in uncollectable money due. Improvements in regulations governing disclosure of ownership for licensure and the liability of controlling interests significantly improves AHCA's authority to collect overpayments if our system can support connecting the owner/controllers interest relationships between providers and our accounts receivable are retained in an integrated system that allows easy connection to the licensing process.

PROPOSED SOLUTION: This budget request for an online licensing system would allow the Agency to further streamline processing of provider applications, integrate stand-alone systems, and keep up with the shift in corporate structure/ownership in the health care industry anti-fraud effort.

IMPACT OF NOT FUNDING THIS ISSUE: The public expectation is easier and quicker access to information and more direct contact with the government through email and websites. This efficient communication depends on stable, reliable network

and other infrastructure components. Without the online licensing system, the Agency will not be able to fulfill these expectations. Additionally, without integration with other Agency account receivable systems for fees, assessments, overpayments, and fines, the Agency will not be able to efficiently and effectively collect monies due before licenses are issued.

VALUE AND BENEFIT(S) OF PROPOSED INFORMATION TECHNOLOGY PROJECT OR ISSUE: The electronic interface will reduce application processing time for providers, and achieve greater efficiency in the use of state resources to process these applications as the Agency manages a consistently increasing workload. It will also allow the Agency to effectively and efficiently collect monies due to the Agency prior to the issuance of a license.

BUDGET SUMMARY: Health Quality Assurance has developed a 3-year \$5.2 million budget issue planned for submission during the upcoming session to implement an online licensure application system that will further streamline processing of provider applications and eventually enable reduction in staff.
