AGENCY ISSUE NARRATIVE:

2011-2012 BUDGET YEAR NARRATIVE:

IT COMPONENT? NO

This issue transfers 2 FTE, rate and associated costs for graphic services from the Southwood Shared Resource Center (SSRC) to the Executive Office of the Governor (EOG). These 2 positions provide graphic services primarily to Executive Office of the Governor and some state agencies to enhance communications with the public. They presently function as "cost recovery" positions at the SSRC whereby state agencies reimburse the SSRC using a pre-determined rate for time spent per project. Currently the two graphic services positions are housed in the Capitol Building to enable close proximity to the Governor and public communications offices. Because these graphics positions are functioning primarily

TRANSFER POSITIONS TO THE EXECUTIVE				
OFFICE OF THE GOVERNOR (EOG)				1700020

in service to the EOG, it is more cost effective to transfer the 2 positions to the EOG. The positions requested to be transferred are as follows:

Graphics Manager-SES: Oversee the delivery of services available through the graphics unit; responsible for direction, coordination and prioritization of all graphic support activities; assist in the research and development, configuration and deployment of software and other resources related to the graphics environment; and creation of databases, scanning of documents, administration of various databases.

Graphics Consultant-SES: Highly professional position overseeing the production of a variety of publications for the agency; includes responsibility of accepting draft for editing, formatting and publishing finished documents using personal computer-based desktop publishing and graphic design software; requires skills necessary to design and enhance a variety of publications; coordinates the design, production and typesetting of department-wide materials including booklets, brochures, charts, posters, manuals, annual reports, business forms; production of such publications would include editing, proofreading, formatting and design; designs and maintains computerized desktop publishing systems; and includes the evaluation and recommendation of desktop publishing and computer graphics software and hardware.

This issue requests reduction of 2 FTE, rate and \$163,305 in EDP Working Capital Trust Fund from the Southwood Shared Resource Center. The Executive Office of the Governor's budget will be increased in a corresponding issue in their budget.

Position Title	Class Code	Pay Grade	FTE	Annual Rate	Annual Budget
Graphics Manager SES	3718	418	1.0	60,231	81,660
Graphics Consultant SES	3719	418	1.0	45,174	63,892

This issue impacts the "Information Technology Applications Development" activity.

TOTAL ISSUE.....	225,000	130,000		

AGENCY ISSUE NARRATIVE:

2011-2012 BUDGET YEAR NARRATIVE: IT COMPONENT? YES

ISSUE SUMMARY: The Southwood Shared Resource Center (SSRC) requests \$225,000 to perform a hardware refresh of Windows and Open Systems servers and related equipment at the data center.

PROBLEM STATEMENT: The SSRC data center has aging servers that need replaced to reduce the risk of system failures and service outages.

Currently, the Windows and Open System Platforms have no approved spend plan items for routine replacement of aging hardware. Of the 34 Windows and 33 Open Systems physical servers in production on 7/6/2010, (68%) and (39%) respectively will be 5 years or older on 7/1/2011. This number decreases to (56%) for Windows and (24%) for Open Systems, if existing virtualization and retirement plans for Fiscal Year 2010-11 are successfully implemented. This aging equipment increases the risk of failure and service outages.

This issue replaces aging hardware which will contribute to the Platform's ability to meet Service Level Agreements (SLA) targets and via consolidation, may add some capacity for anticipated customer service needs or emergency deployments. An estimated 10 servers and related incidentals are included in this request. Replaced equipment will be demoted to test and development services.

This issue may impact Windows rates due to the additional \$70,000 in contract costs. However, these additional costs are very likely to be offset by the additional saleable units. Open Systems rates may well decrease due to the lower maintenance costs of the new equipment.

The impact of not refreshing this equipment will be increased hardware maintenance costs as additional servers fall out of manufacturer's warranty. More importantly the risk of service outages will continue to increase. Additionally, the SSRC's ability to meet SLA commitments may be jeopardized and the SSRC will not have capacity to meet increased customer demands or emergencies.

FISCAL INFORMATION: Estimated costs are \$130,000 in the Operating Capital Outlay appropriation for hardware and \$70,000 in the Special Categories: Contracted Services appropriation for software purchases and licensing. Additionally, there will be a recurring cost of approximately \$25,000 in Special Categories: Contracted Services for annual license and maintenance costs.

	=====	=====	=====	

AGENCY ISSUE NARRATIVE:

2011-2012 BUDGET YEAR NARRATIVE:

IT COMPONENT? YES

ISSUE SUMMARY: The Southwood Shared Resource Center (SSRC) requests \$24,000 to refresh the uninterruptable power supply (UPS) batteries and power supplies at the data center.

PROBLEM STATEMENT: The SSRC data center UPS system has batteries and power supplies that require replacement.

The SSRC currently utilizes two (2) 80kW APC Inline UPS units to provide additional power for the Tier III computer room floor. The units were purchased in 2007. The manufacturer recommends that the batteries be replaced every 3 - 5 years. According to the recommendation above the SSRC's batteries are now at end life. The SSRC also needs to replace 2 failed power supplies in order to retain redundancy.

These systems impact the additional electric, raised floor and rack mount services, and all customers and services supported on the data center's Tier III floor.

The impact of not replacing this equipment will be low battery capacity and multiple UPS failures which will reduce or eliminate redundancies needed to maintain the data center's Tier III floor.

FISCAL INFORMATION: The SSRC requests \$24,000 to refresh the uninterruptable power supply (UPS) batteries and power

AGENCY ISSUE NARRATIVE:

2011-2012 BUDGET YEAR NARRATIVE:

IT COMPONENT? YES

ISSUE SUMMARY: The Southwood Shared Resource Center (SSRC) requests \$37,100 to perform a hardware refresh of data center Local Area Network (LAN) network switches.

	COL A03		COL A04		COL A05		CODES
	AGY REQUEST FY 2011-12	POS	AGY REQ N/R FY 2011-12	POS	AG REQ ANZ FY 2011-12	POS	
MANAGEMENT SRVCS, DEPT OF							72000000
PRG: SOUTHWOOD RES CENTER							72910000
SOUTHWOOD SHARED RES CTR							72910100
GOV OPERATIONS/SUPPORT							16
INFORMATION TECHNOLOGY							1603.00.00.00
EQUIPMENT NEEDS							2400000
REFRESH - LOCAL AREA NETWORK (LAN)							
NETWORK SWITCHES							24013C0

PROBLEM STATEMENT: The SSRC data center has aging network switches that needs replaced to reduce the risk of system failures and service outages.

The SSRC currently has 60 - CISCO 2950 (24 -port) switches deployed that support the LAN for the SSRC. These switches are at their end of service life cycle and Cisco will no longer provide primary or extended support after October 1, 2011. In order to have sufficient time to complete this equipment refresh it is imperative that the SSRC procure replacement switches and start redistribution of new switches immediately.

This issue will procure 25 - CISCO 2960G (48-port) switches to replace the existing switch infrastructure and consolidate switches to reduce the overall number of distributed switches and on-going maintenance costs. The SSRC would need to procure 3 network cabinets to house the new switches, which would allow for even distribution across the Tier III floor.

This issue impacts all data center services because these switches support the SSRC network, LAN and backup connectivity.

The impact of not refreshing these switches will be no vendor support and service from CISCO. The rate of switch failure will increase which will cause network outages for SSRC customers on that switch. A network outage could cause a substantial loss of revenue for the affected customers as well as non-compliance with SLA requirements.

FISCAL INFORMATION: The \$110,000 switch procurement would be purchased through a 5-year Consolidated Equipment Financing Program (CEFP) loan. The annual payments would be approximately \$22,000 including interest. The cabinets would be procured directly for \$5,800 using non-recurring Operating Capital Outlay appropriation. Recurring switch maintenance through Special Categories: Contracted Services appropriation would be \$9,300.

This issue impacts the "Information Technology Computer Operations" activity.

TOTAL ISSUE.....	615,310			

AGENCY ISSUE NARRATIVE:

2011-2012 BUDGET YEAR NARRATIVE:

IT COMPONENT? YES

ISSUE SUMMARY: The Southwood Shared Resource Center (SSRC) requests \$615,310 to replace existing disk storage systems at the data center.

PROBLEM STATEMENT: The SSRC data center has an aging disk storage system that needs replaced to reduce the risk of system failures and service outages.

Currently the Storage Platform has no budget for storage infrastructure replacement. The SSRC has 159 terabytes of storage within multiple Storage Area Networks (SAN) which will be at their end of service life (EOSL) cycle by the end of Fiscal Year 2011-12. EOSL is the date at which a vendor has discontinued both primary and extended support for a product.

This issue will procure a new storage array and a new single SAN infrastructure to reduce the complexity and administrative costs of the storage network while correcting the EOSL problems the SSRC faces. This solution will leverage thin provisioning and deduplication to reduce the amount of physical disk space required and increase utilization percentage of the hardware. Administration staff costs may also be reduced from the resulting homogeneous storage network.

This issue impacts the following services as they all use storage: Distributed Storage, Backup, Windows Managed Server, Managed SQL Server, Short Term Email, UNIX Managed Server, Open Systems Net Based Services, and Oracle Premium Managed Server.

The impact of not replacing the SAN will be increased hardware maintenance cost if service and parts are available. The

AGENCY ISSUE NARRATIVE:

2011-2012 BUDGET YEAR NARRATIVE: IT COMPONENT? YES
 ISSUE SUMMARY: The Southwood Shared Resource Center (SSRC) requests \$147,596 to upgrade the backup solution at the data center.

PROBLEM STATEMENT: The SSRC data center current backup solution has an increasing risk for data loss and increasing recovery times.

The SSRC's current backup solution, Networker (NW), has two primary areas which are increasing the risk of data loss and recovery time for the organization. The SSRC has selected VMware as its primary server virtualization platform. The SSRC's current backup solution requires two backups to capture a single Virtual Machine (VM) host, one for a file level and one for the host level restoration (vmdk files). This is very costly in both time and resources, including tapes. The development of larger hard disks has increased the local storage capacity of servers into the terabytes. These servers generally have a single network connection using either 100 or 1000 bps. The SSRC currently has some servers with as much as 16 terabytes of local data and it is taking 1.5 days to back them up on NW. These long back-up jobs increase the risk of failure exponentially, creating an unacceptable backup solution for these environments.

This issue proposes to replace a portion of the existing backup environment with a new disk-based solution using source based deduplication to incorporate the necessary functionality to perform daily full backups in a fraction of the time required by our traditional disk/tape based backup solution. This solution would also provide backup for the virtual environment with a single pass thereby reducing the backup window and storage requirements for all virtualized servers yet still providing both file and machine restoration.

This issue impacts Backup Services, Windows Managed Server, SQL Server UNIX Managed Server, Oracle Managed Database services and Open System Net Based Services.

The impact of not funding this issue will increase the risk of the state losing and not be able to recover lost application data, and the SSRC will see an increased risk of not meeting the customer Service Level Agreements (SLA) requirements.

FISCAL INFORMATION: The \$356,240 backup solution procurement would be purchased through a 5-year Consolidated Equipment Financing Program (CEFP) loan. The annual payments through Special Categories: Payment of Commodity Contracts would be approximately \$94,844 including interest. Recurring system maintenance through Special Categories: Contracted Services appropriation would be \$52,752.

This issue impacts the "Information Technology Computer Operations" activity.

AGENCY ISSUE NARRATIVE:

2011-2012 BUDGET YEAR NARRATIVE:

IT COMPONENT? NO

ISSUE SUMMARY: This issue requests \$241,446 to fund two bureau chief positions created by the approved reorganization of the Southwood Shared Resource Center (SSRC).

PROBLEM STATEMENT: The SSRC was reorganized effective July 1, 2010, but was not funded two bureau chief positions established in the reorganization.

This issue requests two FTE, rate and budget necessary to establish the Bureau Chief of Production System Services and the Bureau Chief of Administrative Services positions.

The SSRC reorganization was approved to align with the requirement that the SSRC become operationally and administratively independent from the Department of Management Services and to create a management structure that would

DATA CENTER REORGANIZATION							3000050

more effectively manage the increase in agency size and responsibilities coinciding with data center consolidation.

The SSRC Board of Trustees approved and endorsed the reorganization. The Board of Trustees had approved the reorganization to reduce the number of direct reports to the SSRC Executive Director in order to establish a more effective management structure. This issue if funded would reduce the direct reports from ten to five. The Chief of Production System Services was included in the 2010 Legislative work papers for inclusion in the final bill but was inadvertently dropped when the final conference report was assembled.

FISCAL INFORMATION: The positions' Salaries and Benefits costs are as follows:

Position Title	Class Code	Pay Grade	FTE	Annual Rate	Annual Budget
Chief of Production System Services	7487	530	1.0	92,700	120,398
Chief of Administrative Services	7488	530	1.0	75,000	99,430
				167,700	219,828

This issue impacts the "Information Technology Computer Operations" and "Information Technology Administrative Services" activities.

AGENCY ISSUE NARRATIVE:

2011-2012 BUDGET YEAR NARRATIVE: IT COMPONENT? NO

ISSUE SUMMARY: This issue requests \$75,308 to fund an Administrative Assistant III position.

PROBLEM STATEMENT: The Southwood Shared Resource Center (SSRC) does not have sufficient administrative assistant support.

This issue requests an Administrative Assistant III position be established with a rate of \$46,500 and a budget of \$75,308 to address the increase in administrative assistant workload and responsibilities.

Since the SSRC was established on July 1, 2008 with 38 FTE. In Fiscal Year 2009-10 the FTE was increased to 70 and in Fiscal Year 2010-11 the FTE was increased to 97. These increases were the result of mainframe consolidation, full service transfer initiative and the establishment of the SSRC business office which includes the position of General Counsel for the SSRC. The statutorily mandated data center consolidations will add staff to support the data centers being moved into the SSRC over the next several years. The entire staff is spread between the data center facility and the SSRC's office location.

The SSRC has only two administrative assistants currently to support the above staff and two locations. The staff includes nine managers, one general counsel and one executive director. The addition of the general counsel has added the need for legal support job skills that currently do not exist.

Without the additional position along with the necessary skill sets many higher level administrative assistant tasks will either not be done or have to be done less efficiently by the managers, general counsel and executive director and at a higher cost taking time away from this staff to perform their management and legal responsibilities.

FISCAL INFORMATION: The additional positions' Salaries and Benefits costs are as follows:

AGENCY ISSUE NARRATIVE:

2011-2012 BUDGET YEAR NARRATIVE:

IT COMPONENT? YES

ISSUE SUMMARY: The Southwood Shared Resource Center (SSRC) requests \$20,000 to expand the security vulnerability and intrusion detection tools at the data center.

PROBLEM STATEMENT: The SSRC data center needs to expand the security vulnerability and intrusion detection tool (QualysGuard) to accommodate the data center consolidation of the Department of Corrections (DOC) and Department of Transportation (DOT).

The SSRC is mandated, per Agency Enterprise Information Technology-Office of Information Security (AEIT-OIS), to provide certain security services (vulnerability identification, intrusion detection, monitoring, and security remediation). Currently the SSRC currently has no budget for additional QualysGuard security scanning licenses or devices to accommodate systems added through data center consolidation.

This issue provides the recurring costs to procure and maintain the necessary QualysGuard licenses and devices to accommodate the on-boarding of DOC and DOT systems. We are estimating that those two new customers will bring on 500 additional devices that will require coverage. Each of the two agency specific systems will require a scanning device and appropriate number of licenses.

This issue impacts the DOC and DOT systems directly and indirectly impacts all data center systems connected to the network.

The impact of not funding this procurement will cause the SSRC to not be in compliance with AEIT-OIS mandates, and will incur increased risk for a security event or data breach.

FISCAL INFORMATION: The \$10,000 estimated recurring costs will provide for up to 500 device licenses and 2 network appliances. (500 Qualys licenses at \$14/device, plus \$1,500 per each of the 2 scanning appliances)

This issue impacts the "Information Technology Computer Operations" activity.

=====

AGENCY ISSUE NARRATIVE:

2011-2012 BUDGET YEAR NARRATIVE: IT COMPONENT? YES
 ISSUE SUMMARY: The Southwood Shared Resource Center (SSRC) requests \$25,268 to expand the available Uninterrupted Power Supply (UPS) power at the data center.

PROBLEM STATEMENT: The SSRC data center will have insufficient Tier II floor UPS power to support increased demand from data center consolidation.

The SSRC procured a Scalable 250kW - 500kW in-line UPS to support the new Tier II raised floor being deployed for use. The new unit was procured and is currently populated with 10 power modules that provide the SSRC with 250kW of useable UPS power. As data center consolidation moves forward the SSRC will need to ramp up the additional 250kW quickly by procuring an additional 10 power modules and a single battery cabinet (batteries included) in order to utilize the entire 500kW this unit is able to provide.

This issue procures the additional 10 power modules and single battery cabinet (batteries included) in a single procurement. This will allow the SSRC to support the various agencies slated to move into the facility from Fiscal Year 2010-11 through Fiscal Year 2012-13 requiring Tier II floor space.

This issue impacts Additional Electrical services, Raised Floor services and Rack Mount services, and all customers/services supported by the Tier II floor.

The impact of not funding this issue will cause the available 250kW capacity on the Tier II floor to be exhausted before all data center consolidation agencies come on board. In which case the SSRC will be unable to add new agency equipment to the data center and meet legislative mandates of data center consolidation.

FISCAL INFORMATION: The \$122,900 UPS expansion procurement would be purchased through a 5-year Consolidated Equipment
