## CIP-5: Service-Level Capital Renewal Projects

### HIGHWAY OPERATIONS - MINOR RENOVATIONS, REPAIRS, IMPROVEMENTS - STATEWIDE

#### FY 2011-2012

**\$5,203,372**

The capital renewal budget will fund projects such as repairs, replacements, renovations, improvements and/or additions to maintain Department facilities at an acceptable level and to materially extend the useful life of the facilities. Examples of the type of work that will be done include: correcting code/safety deficiencies; roof replacement; Heating, Ventilation and Air Conditioning (HVAC) replacement/repair; electrical/plumbing/sewer repairs; interior/exterior refinishing; data/phone/ communication repairs; installation of fuel tank canopies; re-paving of parking areas; security system repairs; carpet/flooring replacement, etc.

The Department used a factor of \$1.63 per square foot applied to the square footage of facilities listed on the Florida Accounting Information Resource (FLAIR) facility inventory to determine the amount of budget for routine capital renewal of Department owned property. The \$1.63 is the same factor used by the Department of Management Services (DMS) to develop their Legislative Budget Request. It consists of \$1.38 per square foot to maintain the shell of the building such as HVAC, Roof, Electrical, etc., plus \$.25 per square foot for tenant needs such as painting, carpeting, etc. The Department combined the two because it maintains its own buildings, while DMS leases to tenants.

The minor repairs calculations generated \$7.4M of department wide needs. The Department requests \$5,203,372 of the total FY 2011-2012 need in the Highway Operations budget entity. Proposed projects are:

Sarasota Operations Center Renov	12,000
Arcadia Operations Center Renov	217,500

## CIP-5: Service-Level Capital Renewal Projects

### HIGHWAY OPERATIONS - ENVIRONMENTAL SITE RESTORATION

#### FY 2011-2012

**\$1,180,000**

Budget is requested in FY 2011-2012 to continue funding Environmental Site Restoration work to clean up contaminated soil and groundwater at various Department facilities statewide to restore those sites to an environmentally uncontaminated, clean and safe condition. Failure to perform the needed cleanup will result in violation of the Federal Resource Conservation and Recovery Act.

The original restoration plan was based on anticipated tasks required at the various sites based on June 1995 surveys. As the initial work was performed, changes to the plan were identified. In some cases the amount of work to complete the remediation increased, based on additional discoveries at the sites. In other cases, the remediation efforts were found to be less extensive than originally estimated and requirements were decreased. New sites are being added due to the consolidation of facilities. A contamination assessment and remediation of any contamination are required before the Department may sell the old facilities. Some new sites are added due to newly found contamination at existing facilities.

Due to the uncertainties related to dealing with contaminants and contaminated soil/groundwater, this issue will be revisited each year to determine whether the needs have increased or decreased as tasks are performed and additional information is obtained.

## **CIP-5: Service-Level Capital Renewal Projects**

### **HIGHWAY OPERATIONS - UNDERGROUND STORAGE TANK PROGRAM**

#### **FY 2011-2012**

**\$100,000**

Section 376.303, Florida Statutes, and the Rules of Department of Environmental Protection (DEP) require replacement of underground storage tanks and upgrade of monitoring procedures to be accomplished within given timeframes according to the type of facility. This program is designed to accomplish the removal and/or replacement of existing storage tanks to comply with applicable laws, rules and codes.

This issue requests budget in FY 2011- 2012 to fund the removal of underground fuel storage tanks and associated minor remedial actions. Examples of work typically associated with this type of project are: 1) removal and disposal of existing tanks, 2) installation of new tanks and associated piping, 3) dispensing systems and lines, 4) release of detection systems, 5) vapor recovery systems, 6) initial site contamination clean-up, and 7) other related activities and equipment as required to comply with Department of Environmental Protection requirements and Florida Statutes.

Fiscal Year 2011-2012 budget is requested to remove the existing underground storage tank at the District Four Broward Operations Center. This is the 2nd phase of the Underground Tank Replacement Program at the Operations center to physically remove the existing underground storage tanks. The 1st phase to install above ground fuel system has been completed.

## CIP-5: Service-Level Capital Renewal Projects

### EXECUTIVE DIRECTION - MINOR RENOVATIONS, REPAIRS, IMPROVEMENTS - STATEWIDE

#### FY 2011-2012

**\$1,870,408**

The capital renewal budget will fund projects such as repairs, replacements, renovations, improvements and/or additions to maintain Department facilities at an acceptable level and to materially extend the useful life of the facilities. Examples of the type of work that will be done include: correcting code/safety deficiencies; roof replacement; Heating, Ventilation and Air Conditioning (HVAC) replacement/repair; electrical/plumbing/sewer repairs; interior/exterior refinishing; data/phone/ communication repairs; installation of fuel tank canopies; repaving of parking areas; security system repairs; carpet/flooring replacement, etc.

The Department used a factor of \$1.63 per square foot applied to the square footage of facilities listed on the Florida Accounting Information Resource (FLAIR) facility inventory to determine the amount of budget for routine capital renewal of Department owned property. The \$1.63 is the same factor used by the Department of Management Services (DMS) to develop their Legislative Budget Request. It consists of \$1.38 per square foot to maintain the shell of the building such as HVAC, Roof, Electrical, etc., plus \$.25 per square foot for tenant needs such as painting, carpeting, etc. The Department combined the two because it maintains its own buildings, while DMS leases to tenants.

Due to an organizational change involving the transfer of functions and equipment of the Department's Office of Information Systems' data center to the Southwood Shared Resources Center (SSRC) in the Southwood Complex that is scheduled to take place in 2012, an asbestos abatement renovation project of the first floor of the Haydon Burns Building in Tallahassee in the amount of \$785,400 is also included in this minor projects budget request.

The minor repairs calculations generated \$7.4M of department wide needs. The Department requests \$1,870,408 of the total FY 2011-2012 need in the Executive Direction budget entity. Proposed projects are:

Lake City District Administration Office Renovations	\$196,000
Chipley District Administration Office Renovations	\$25,000
Ft. Lauderdale District Administration Office Renovations	\$85,000
Deland District Administration Office Renovations	\$400,000
Miami District Administration Office Renovations	\$138,433
Tampa District Administration Office Renovations	\$60,575
Tallahassee Burns Building Central Office Renovations	\$965,400
<b>- - - Executive Direction Subtotal =</b>	<b>\$1,870,408</b>
