AGENCY NARRATIVE:

2013-2014 BUDGET YEAR NARRATIVE: LAND ACQUISITION IT COMPONENT? NO

Amended 2013-14 Narrative after February 1, 2013

Issue Summary:

This is a request for spending authority which is needed for the Division of State Lands (DSL) to acquire lands with funds received through grants and military partnerships.

Many of DSL's grant opportunities are with the military where desired properties fall within the Florida Forever project boundaries. Cost share agreements provide a lower cost and greater conservation benefit to the people of the state. These cost share agreements with the military stabilize the land uses around military installations and prevent land uses that could be incompatible with the continued function and mission of the military.

Conservation lands are essential to the state's citizens, visitors, and economy because they provide essential ecosystem services such as clean and sufficient water, clean air, flood control, and coastal buffering during storms. These lands are vital for filtering and replenishing Florida's aquifers the source for 90% of our drinking water. They provide a desirable framework for the state's leading industries from tourism to agriculture to home buying and business location. For individuals and businesses wishing to locate in Florida, they provide a window into Florida's lifestyle and quality of life.

The requested spending authority is needed to utilize funds from existing military grants and a grant from the Coastal and Estuarine Land Conservation Program (CELCP). The CELCP funds will be used as pass through and match will be provided by local governments. If any of the existing grants fall through, the spending authority could be utilized for other grants that may become available for land acquisition.

Authorization to utilize funds received through grants will enhance DSL's efforts to pursue innovative ways to acquire lands for conservation and recreation purposes.

AGENCY ISSUE NARRATIVE:

2013-2014 BUDGET YEAR NARRATIVE: IT COMPONENT? NO

Amended 2013-14 Narrative after February 1, 2013

Issue Summary:

The Silver Springs attraction in Ocala and its surrounding property is one of Florida's most significant natural and cultural features. The springs are located within the boundary of Silver River State Park. The main spring has one of the largest known flows of any spring in the world. The springs are the headwaters of the Silver River which flows approximately 6 miles to its junction with the Ocklawaha River.

The attraction is adjacent to Silver River State Park in central Marion County just east of Ocala. Much of the property surrounding Silver Springs is under public ownership. The Silver River State Park, Silver Springs Conservation Area, Ray Wayside Park (Ocala Boat Basin), Indian Lake State Forest, the Ocala National forest and the Marjorie Harris Carr Cross Florida Greenway are owned and/or managed by local, state and/or federal agencies.

The 242 acre Silver Springs attraction property was acquired by the Board of Trustees of the Internal Improvement Trust Fund (BTITF) in 1993. The current lessee, Festival Fun Parks, LLC (also known as Palace Entertainment, or Palace) operates under a lease that expires on December 31, 2029. On January 9, 2013, Palace stated its intent to end its management of the attraction effective September 30, 2013. The attraction will be taken over as a state park effective

October 1, 2013. Many of the facilities and infrastructure are old and in poor condition. As such, decisions have been made regarding what components of the attraction need to remain and what need to be demolished.

The property is an important environmental and cultural resource and the Department of Environmental Protection (DEP) is committed to ensuring its protection. On December 12, 2012, a public workshop was held to discuss the potential of including the current attraction property as part of the state park system. Approximately 400 people attended the meeting with many expressing support for the property to be leased to DEP's Division of Recreation and Parks (DRP) for management as part of a state park.

A second public workshop was held on January 14, 2013. Approximately 200 citizens attended with many expressing their preferences regarding the transition plan. On January 23, 2013, the governor and cabinet approved a lease amendment facilitating an early termination of Palace's lease and authorized DEP to include the property in the existing Silver River State Park lease to be managed by the Division of Recreation and Parks (Division).

Legislative funding to manage the property surrounding the springs as part of a state park is essential to a successful transformation. The park is anticipated to generate over \$1.3 million per fiscal year. Recurring operating costs including staffing are estimated to be just over \$850,000 annually. This plan is based on minimizing the operational costs to the state while creating opportunities for private sector job creation and economic stimulus. It focuses on outsourcing the majority of the essential visitor services. It is anticipated that the revenues generated through entrance fees, annual pass sales and concession operations are expected to cover 100% of the annual operating costs associated with these new responsibilities.

The adjacent Silver River State Park offers a range of outdoor recreation opportunities but lacks adequate usable public access to the river. The attraction surrounds the headsprings and offers river access and unique opportunities for expanded recreational opportunities and protection of resources under one state park management unit. The merging of the two properties into a single state park unit at this time fulfills the original legislative intent when the attraction property was purchased in 1993. This is a rare and exciting opportunity to transform this area into a world class state park accessible to citizens for Florida and visitors from around the world.

The Division has a successful background and experience in transitioning attractions with springs into state parks. Examples include: Homosassa Springs, Rainbow Springs, Fanning Springs, Wakulla Springs and most recently Weeki Wachee Springs State Park.

The Division is not requesting FTE positions or Salaries and Benefits funding and will relocate 8 FTE positions from other state parks. \$696,602 in the State Park Operations category is requested for other operating needs, such as \$193,223 to support seasonal positions, \$153,156 to support equipment needs and \$350,223 to support day to day operating

AGENCY NARRATIVE:

2013-2014 BUDGET YEAR NARRATIVE: G/A-F/W AQUATIC HABITAT IT COMPONENT? NO

Amended 2013-14 Narrative after February 1, 2013

Issue Summary:

The Office of Coastal and Aquatic Managed Areas requests Fixed Capital Outlay spending authority in the Federal Grant Trust Fund to conduct restoration of degraded shorelines and spoil islands in Nassau, Duval, St. Johns, Flagler, Volusia, and Brevard counties. The Guana Tolomato Matanzas National Estuarine Research Reserve, in coordination with the Indian River Lagoon and Tomoka Marsh Aquatic Preserve offices is submitting an application for a new federal habitat restoration grant through the National Oceanic Atmospheric Administration (NOAA).

This is a multi-year and regional intertidal habitat restoration project including creation of oyster reefs in wave-impacted areas and enhancing nearby salt marshes. Funding will support contractors for planning, permitting, and implementation (including purchase of reef materials and native vegetation as well as deployment and installation of purchased materials), and internal education, research, and monitoring activities. Costs will include purchases of vehicles, vessels, monitoring equipment, and educational materials as well as OPS support.

Shellfish are both economically and environmentally important resources within Florida. In the short term this project will provide jobs for small business involved in the permitting, planning, and implementation of approximately 15 habitat restoration projects. In the long term the restored resources will support eco-tourism and a recreational fishery. Fishing and wildlife-based eco-tourism should benefit from increased oyster reefs, which provide nursery habitat and/or food for many fish, shellfish, and shorebirds.

Work will also involve the identification and restoration of up to 15 intertidal sites on Florida's east coast. Restoration components will include addition of reef modules that will attract oyster spat, deployment of oyster shell in mesh bags, and installation of appropriate native plants (primarily saltmarsh cordgrass). Minor earthwork may be a component of projects where deemed necessary for erosion control and creation of proper tidal regimes.

A primary portion of the project will recycle oyster shell generated at local restaurants. The collected materials will be placed on debilitated reef areas. This will reduce the volume of waste sent to landfills as well as provide a cost-saving benefit to restaurants, which pay for disposal service based on the weight of the landfill waste generated.

\*\*\*\*\*

AGENCY NARRATIVE:

2013-2014 BUDGET YEAR NARRATIVE: MAIN/REP/CONST-STATEWIDE IT COMPONENT? NO

The Office of Coastal and Aquatic Managed Areas (CAMA) is requesting Fixed Capital Outlay appropriation in the Land Acquisition Trust Fund. This request is for maintenance and construction funding for Fiscal Year 2013-14 in the amount of \$200,000. CAMA's maintenance and construction projects provide critical funding to ensure that the facilities are maintained in a timely, cost effective and professional manner. Lack of maintenance funding in FY 09-10 through FY 11-12 has resulted in a backlog of projects. Further postponement of maintenance funding will cause facilities to fall into disrepair. These funds can be used for contracted services or OPS labor and will provide local employment opportunities.
